# INFANTS' HOSPITAL

**Forty-First Annual Report**

**January 1, 1923 to January 1, 1924**

# INFANTS' HOSPITAL

300 LONGWOOD AVENUE, BOSTON

---

INCORPORATED JANUARY 19, 1881

## Forty-First Annual Report

January 1, 1923 to January 1, 1924

THE INFANTS' HOSPITAL extends to infants not over two years of age medical treatment without regard to sex, race, creed, color or residence.

Emergency cases will be admitted at any time if a vacancy exists. Questions in regard to such cases and other matters of information may be referred by telephone to the Hospital at any time. Telephone Regent 5930.

An affiliated course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital, in affiliation with other organizations, provides instruction for nursery maids. Applications for graduate nursery maids will be received by Household Nursing Association, 222 Newbury Street, Boston, telephone Back Bay 7350.

The Wet Nurse Directory at 63 Binney Street, Boston, is affiliated with the Hospital. Telephone Regent 2930.

Relatives are admitted to the wards on Sundays from 10:30 to 12:00 o'clock.

### *Director of School of Nursing*

MISS MARY L. WAKEFIELD, R.N.

### *Director of Social Service*

MISS MABEL R. WILSON

## AFFILIATION

As a matter of public policy and economy, the Infants' Hospital sold its building on Van Dyke Street to Harvard University for the new School of Public Health. Satisfactory arrangements were made to preserve the memorial character and features of the building. A modern and more adequate building, less expensive to build and operate, was then erected upon land of The Children's Hospital where the work of the Infants' Hospital is carried on under a working agreement between the two hospitals. This new building, likewise a memorial to Thomas Morgan Rotch, Jr., is owned and financed by the Infants' Hospital Corporation and operated at the expense of the Infants' Hospital, through the agency of The Children's Hospital. Activities in the new building commenced June 1, 1923.

The Agreement above referred to is as follows:

THIS AGREEMENT made this first day of September A. D. 1922, between The Children's Hospital and the Infants' Hospital, corporations duly established under the Laws of the Commonwealth of Massachusetts.

W I T N E S S E T H:

FIRST. The Children's Hospital agrees to lease to the Infants' Hospital for the term of ninety-nine (99) years a parcel of land situated in Boston in the County of Suffolk, bounded and described as follows:

Beginning at a point on the Northwesternly side of a sixteen foot passageway lying on the Southeasterly side of the property of The Children's Hospital on Longwood Avenue in Boston, said point being three hundred sixty and  $59/100$  (360.59) feet distant Southwesterly from the Southwesterly line of Longwood Avenue; thence running Southwesterly ninety-five and  $26/100$  (95.26) feet by said Northwesternly side of said passageway; thence turning at a right angle and running Northwesternly one hundred twenty-seven and  $71/100$  (127.71) feet to a point; thence turning at a right angle and running Northeasterly ninety-five and  $26/100$  (95.26) feet to a point; thence turning at a right angle and running Southeasterly one hundred twenty-seven and  $71/100$  (127.71) feet to the point of beginning; containing twelve thousand one hundred sixty-five (12,165) square feet, more or less; said leased premises being shown on a plan by Aspinwall & Lincoln dated August 1922, hereto annexed;

for the annual rental of one dollar (\$1.) so that said Infants' Hospital may erect thereon a hospital for its purposes to be used in connection with The Children's Hospital, in accordance with plans, specifications and contracts to be approved in writing by the Executive Committee of the Board of Managers of The Children's Hospital. The lessee is to have the right to the use of the sixteen foot passageway on the Southeasterly side thereof in common with The Children's Hospital and others having rights therein. The leased premises are subject to the rights of the President and Fellows of Harvard College therein, and The Children's Hospital reserves to itself, its successors and assigns, the right to maintain the existing tunnel thereunder and to lay pipes, wires and drains under, over or across the same and to construct and maintain other tunnels thereunder.

SECOND. Said building shall be known, called and operated as "The Thomas Morgan Rotch Jr. Memorial Hospital for Infants."

THIRD. Title to said building shall be and remain in said Infants' Hospital and shall not vest in the owner of the real estate.

FOURTH. The Infants' Hospital agrees to contribute quarterly or more often if requested by the Treasurer of The Children's Hospital its entire income, above expenses, including such sum or sums as it may receive as income through appeals or otherwise, towards the expenses, costs and charges of the maintenance and administration of said building and the work carried on therein, said payments to be made to or upon the order of the Treasurer of The Children's Hospital which Treasurer shall annually submit to the Board of Directors of the Infants' Hospital a written statement of the cost of the maintenance, administration and operation of said building and the work carried on therein, such statements to show the disposition of funds paid during the year for the purpose by the Infants' Hospital, it being understood and agreed that the Infants' Hospital, through its Board of Directors, Committees, and otherwise, will use every reasonable effort, during the year, either by separate appeal or by appeal in conjunction with The Children's Hospital, to provide sufficient funds so that the expenditures on account of maintenance, administration and operation of said building and the work carried on therein shall not exceed the funds so contributed by the Infants' Hospital. It is further understood and agreed that in estimating the cost and expense of maintaining and administering said building and the work carried on therein, there shall be included a proper proportion of the expense of maintaining nurses and general overhead.

FIFTH. The Children's Hospital agrees after the completion of said building to operate and manage said Infants' Hospital for the performance of hospital work for and in connection with infants, substantially similar in character to that now being done in The Thomas Morgan Rotch Jr. Memorial Building of the Infants' Hospital, now located at No. 55 Van Dyke Street, provided that the obligation on the part of The Children's Hospital shall in no event require the expenditure of any greater sum in any year to operate said Infants' Hospital than the amounts received in such year from the Infants' Hospital under this agreement. Provided that an account shall be kept by The Children's Hospital so that if in any year there shall be a surplus of money received from the Infants' Hospital over and above the amount expended for the maintenance and administration of said Infants' Hospital the same is to be credited against expenses incurred by The Children's Hospital for the Infants' Hospital in subsequent years, and in case of any deficit in any year and The Children's Hospital shall continue to operate said Infants' Hospital

notwithstanding, such deficit may be made up from the income received from the Infants' Hospital in any other year. Any income received by The Children's Hospital which is derived from funds held in trust by the Infants' Hospital for any specific object will be applied to such object by The Children's Hospital in managing and operating the Infants' Hospital as aforesaid.

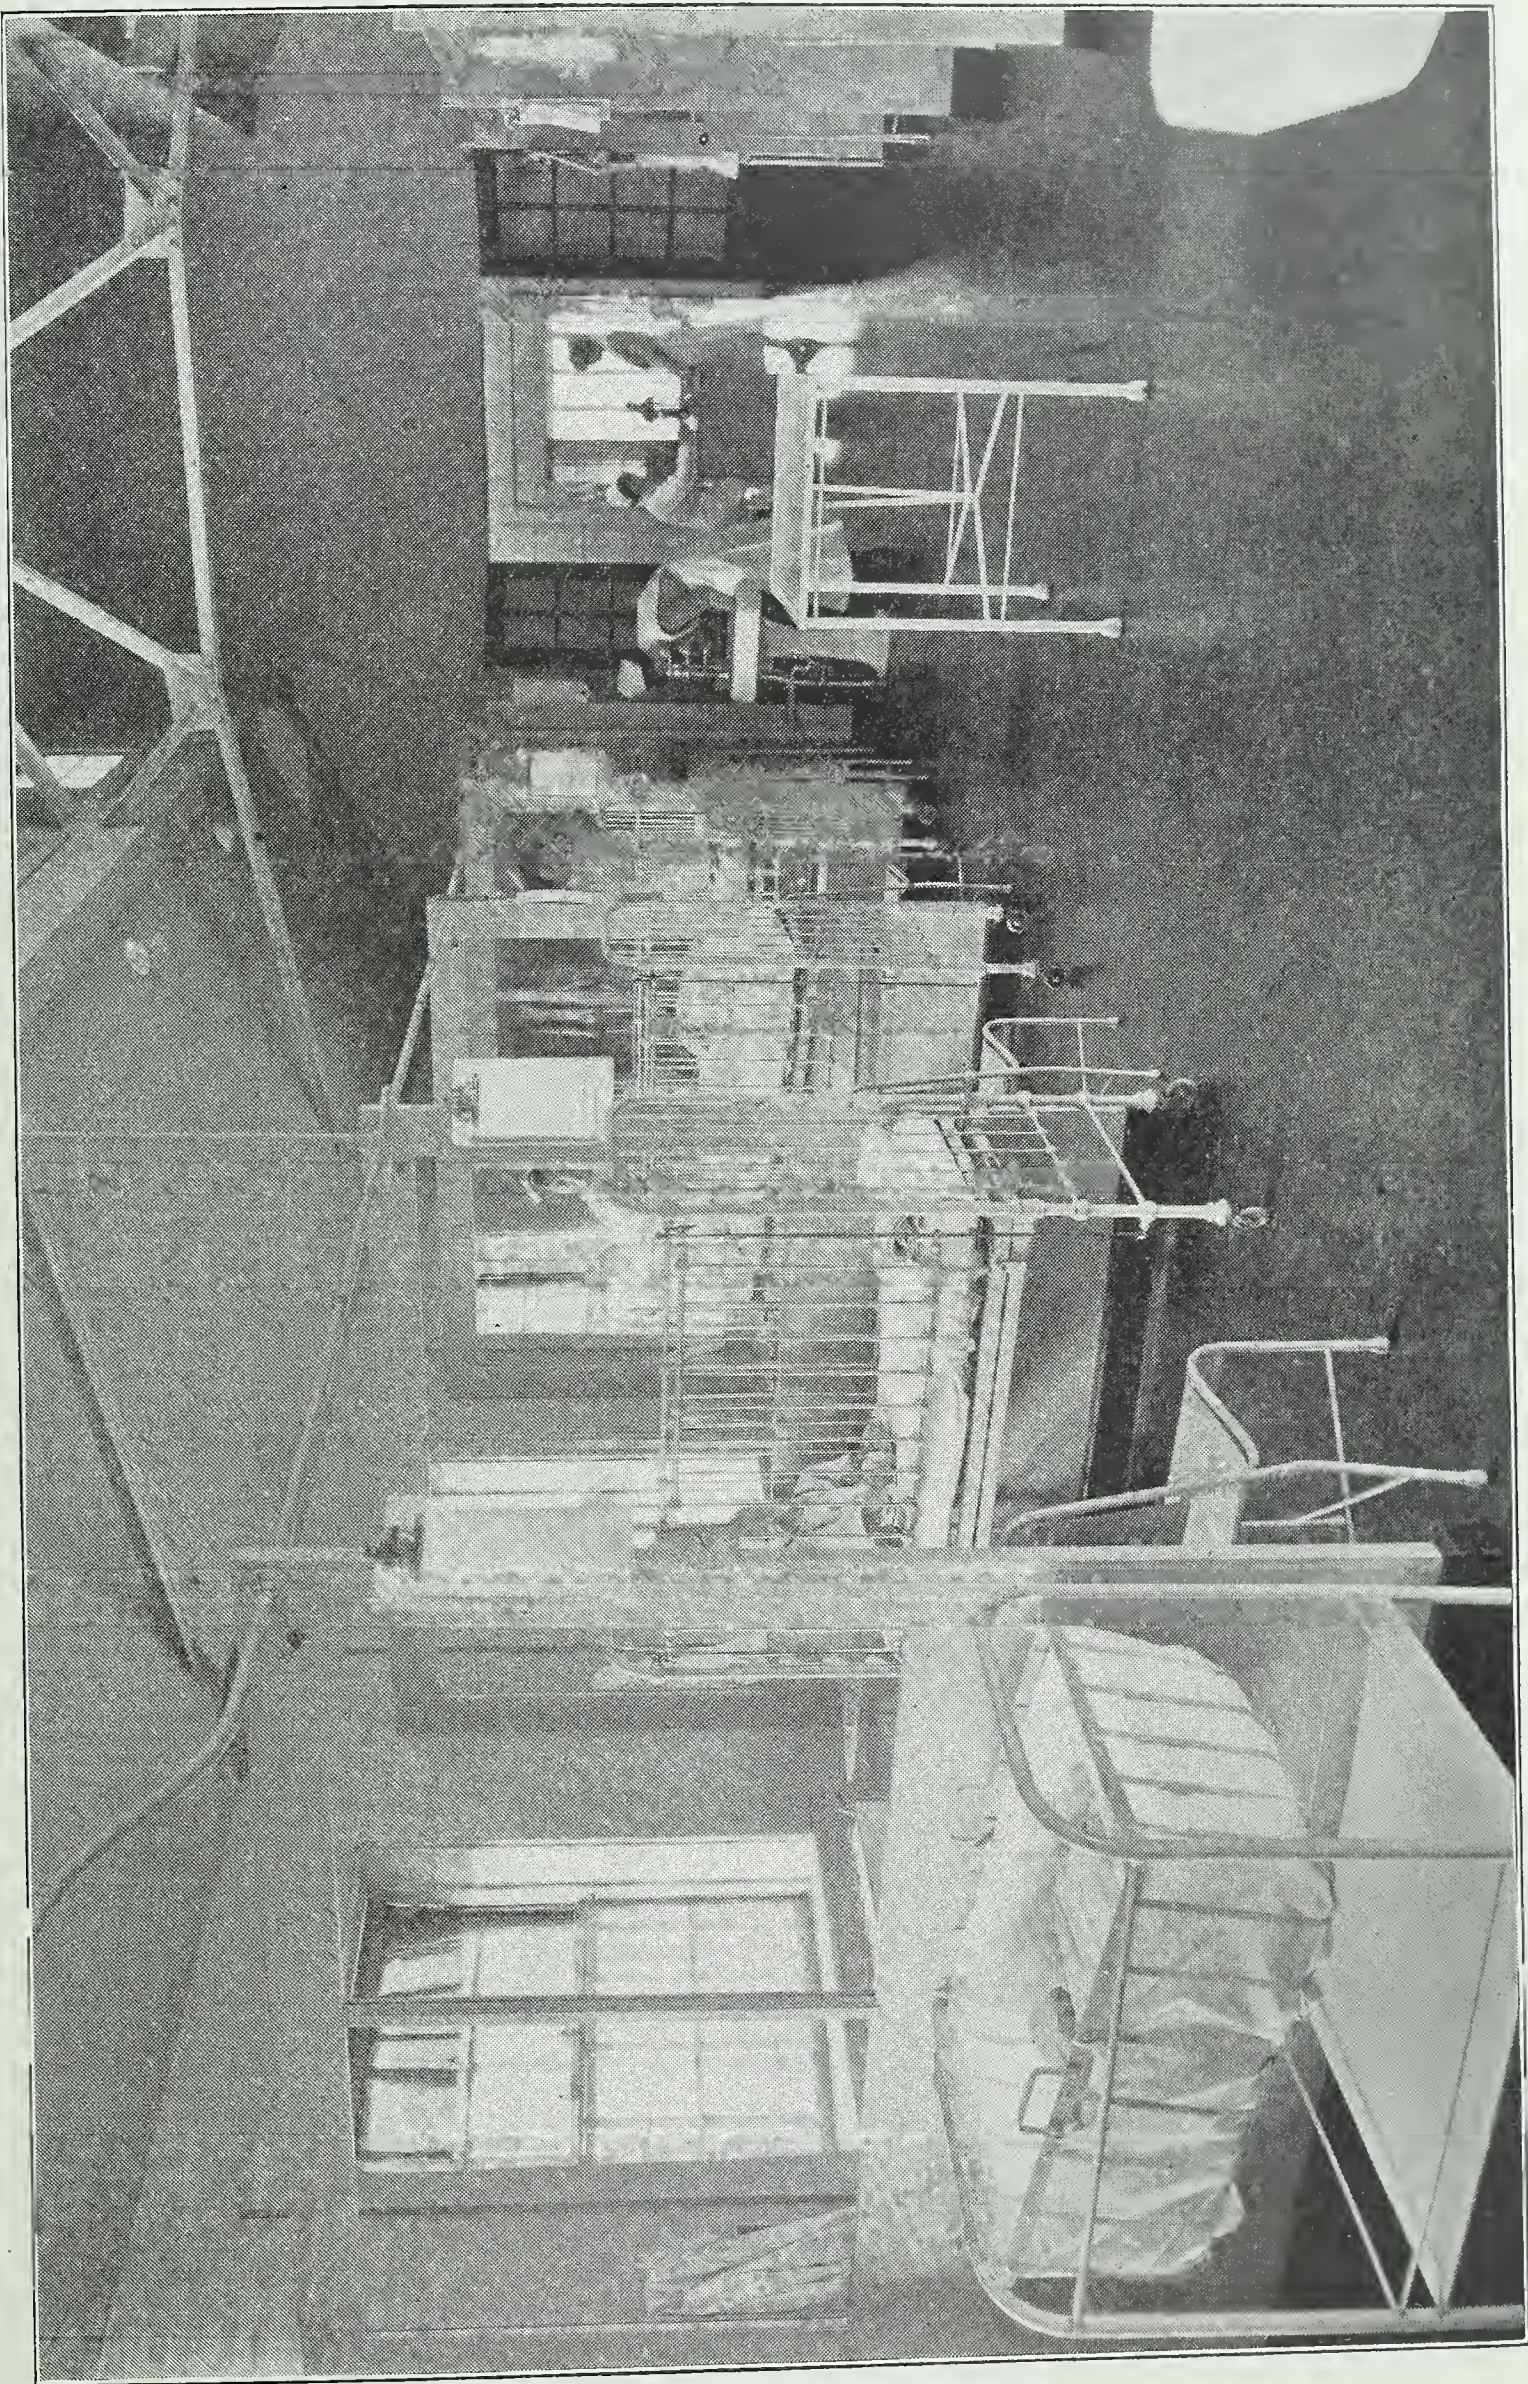

SIXTH. It is the intention of the parties that the Infants' Hospital shall always have a fair and reasonable representation upon the Board of Managers and the Executive Committee of the Board of Managers of The Children's Hospital; that the various committees of the Infants' Hospital shall, if they desire, have a fair and reasonable representation in committees of The Children's Hospital engaged in substantially similar work; that The Children's Hospital will provide at all reasonable times a room or rooms for meetings of the members of the Infants' Hospital, its Board of Directors, and its committees; that The Children's Hospital will so far as possible and practicable give employment to such of the present employees of the Infants' Hospital as the Medical Director of the Infants' Hospital and Arthur G. Rotch may suggest.

IN WITNESS WHEREOF the above named The Children's Hospital and the Infants' Hospital have respectively caused their corporate names to be signed and their corporate seals to be hereto affixed by their duly authorized officers, the day and years first above written.

(Seal) THE CHILDREN'S HOSPITAL,  
By S. H. Wolcott, Treasurer.

(Seal) INFANTS' HOSPITAL,  
By Thomas B. Gannett, President.  
Philip Stockton, Treasurer.

A TYPICAL WARD

## REPORT OF THE MEDICAL DIRECTOR FOR 1923

---

It should be a matter of much satisfaction to those who were instrumental in bringing about the close affiliation between the Infants' Hospital and The Children's Hospital to learn, that the plans made for the care of the infants in the new hospital have been progressing most satisfactorily. There is every reason to believe that the arrangement will prove of even greater advantage to both hospitals than had been anticipated. The service has been most active and the hospital has been filled to its capacity since it was opened. It is evident that even a larger number of beds could be utilized. However, through the close affiliation with the Out-Patient Clinic and the Social Service Department, it is hoped by lessening the average length of stay of the patients in the hospital, the advantages of the hospital may be made available to a larger number of patients than in the past. Five hundred and forty-nine patients with an average stay of twenty-five days were admitted during 1923.

It has been shown that with the development of the unit system, by which the patient is practically isolated from all other patients, cross infections have been materially lessened. There has been but little change in the routine treatment of the patients since the new hospital was opened, except for the use of the more recently advocated measures in the treatment of such diseases as rickets, tetany, summer diarrhea and diabetes. Gratifying results in the steady lessening of the morbidity and mortality from these infantile diseases are evidenced.

Undergraduate and graduate teaching as in the past is being carried on in the wards of the new hospital. The proximity to the central laboratory is a great asset in providing more efficient means for the care of patients and will undoubtedly facilitate the study of obscure diseases peculiar to infants.

An effort is being made to follow more carefully the patients who are discharged from the wards. Through the activities of the Social Service, every patient is returned for a final examination one week after his discharge from the hospital. If at that time, the baby is doing well, then the infant is referred to the Baby Health Center in its district. If the infant is not doing well, it is referred to the Out-Patient Clinic, or is re-entered in the hospital. It is only by careful follow-up work after discharge, that the infants can be prevented from losing much that has been gained during their stay in the hospital.

It is a pleasure to acknowledge the hearty cooperation with which the Board of Directors, the Superintendent, the Ladies' Aid Committee, the Supervisor of Nurses and the other departments of the hospital have responded to the carrying out of plans for bettering the care of the patients and increasing the efficiency of the work.

KENNETH D. BLACKFAN,  
*Medical Director.*

I have examined the books of the Infants' Hospital for the year ending December 31, 1923, and certify that the cash on hand January 1, 1924, has been verified with the Old Colony Trust Company; that an examination and count of the securities kept in the Old Colony Trust Company Vaults have been made and found correct; that the income called for by the investments has been received and properly accounted for; that payments are supported by checks returned through the bank, endorsed by the payee or by other vouchers; that the accompanying report is in agreement with the books and in my opinion correctly sets forth the true financial position of the Hospital on December 31, 1923.

## REPORT OF THE SUPERINTENDENT

---

The first report of the Infants' Hospital since coming under the direction of The Children's Hospital is herewith submitted. Twenty-three babies were transferred from the old Infants' Hospital on June 1, 1923. On June 5th the hospital was open for public inspection. Refreshments were served by the Ladies' Aid Committee.

The hospital is a two-story structure with accommodations for fifty patients. It is ideal in its arrangement and equipment for the care of sick babies.

Dr. Oscar M. Schloss, Medical Director, resigned July 1st, and Dr. Kenneth D. Blackfan was appointed to succeed him. Miss Elizabeth Morris, who was appointed to take charge of the transfer, resigned the end of the year, after having well established the routine system of running the hospital. The nursing is now under the supervision of The Children's Hospital.

The Ladies' Aid Committee donated all of the furnishings and equipment for the new hospital, also a number of books and medical journals for use in the nurses' library, all of which are very much appreciated.

Following are the hospital statistics for the year 1923:

Number of patients remaining in the Hospital Decem-	
ber 31, 1922 . . . . .	45
Number of patients admitted during the year 1923	547
Number of patients discharged during the year 1923	549
Number of patients remaining December 31, 1923	43
Total number of Hospital days . . . . .	13,709

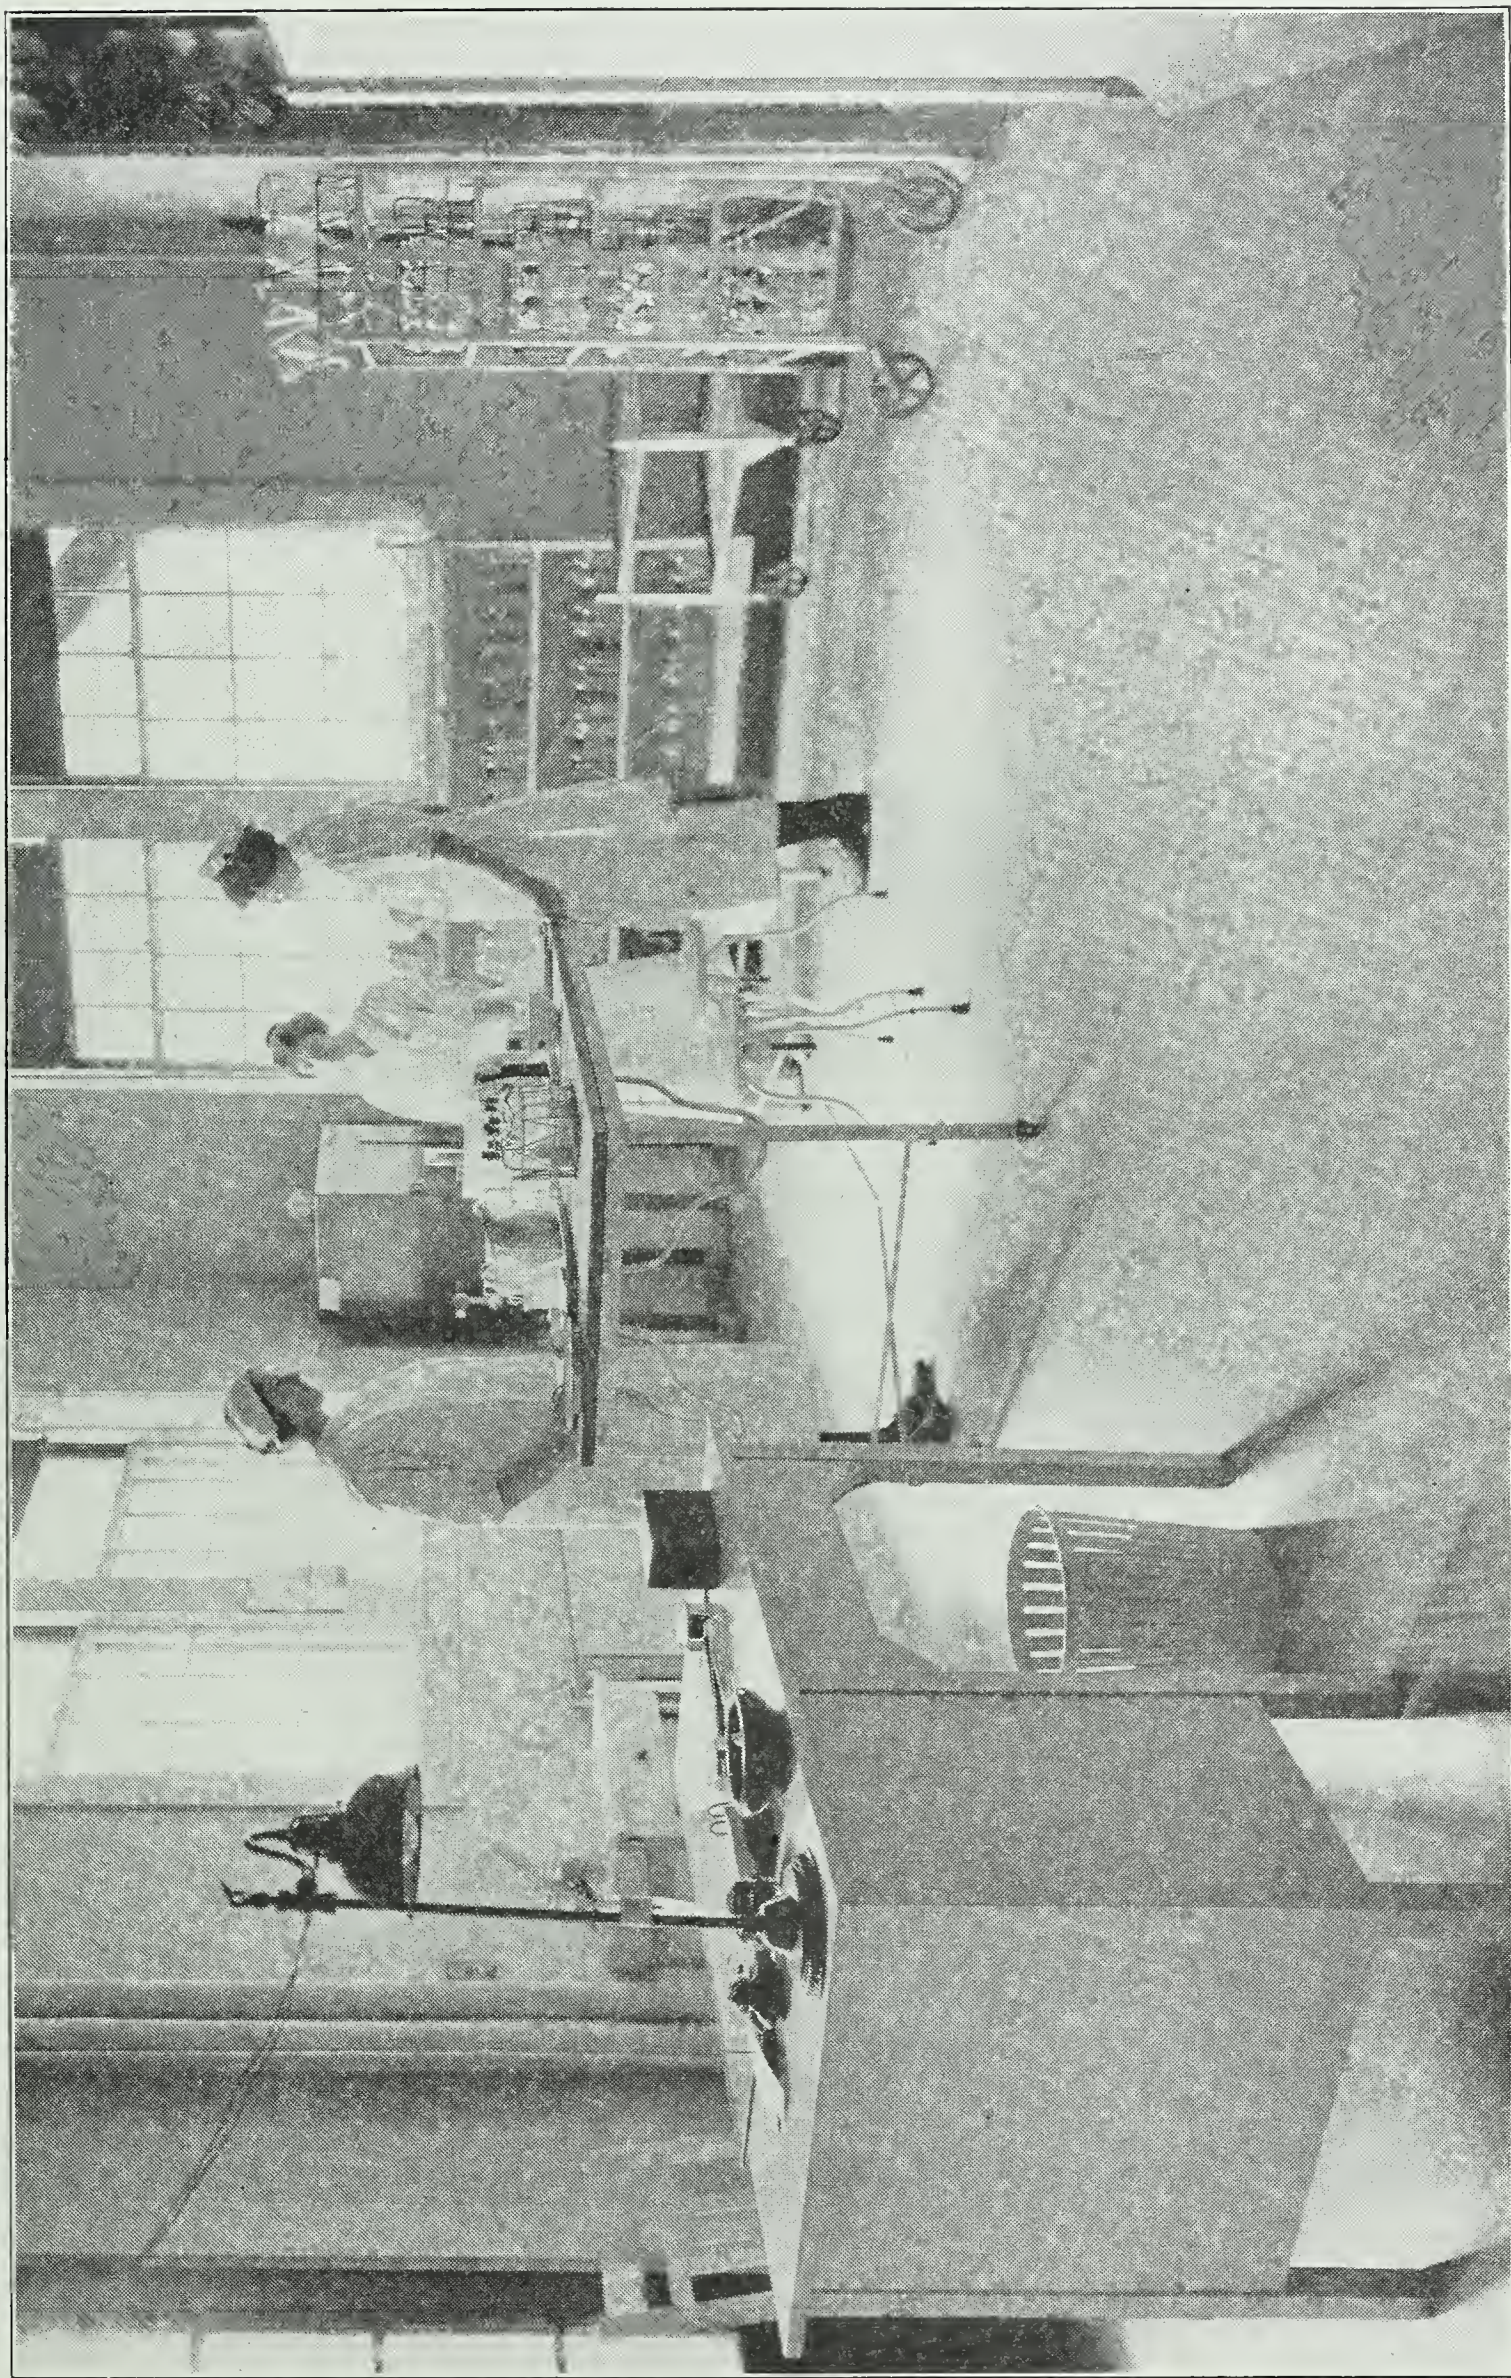

Average number of patients daily	.	.	.	.	37+
Average days' stay per patient	.	.	.	.	25+
Number of patients—Pay	.	.	.	.	111

## REPORT

During the past year there have been 378 cases followed by this department and 1104 visits made to homes, relatives, interested individuals and agencies, in behalf of the patients.

The work of the department has been conducted by a full time worker, full time secretary, and recently a volunteer has given two days weekly.

A visit to the home has been made previous to the patient's discharge from the hospital in all instances where from the child's condition, its social background, or from the history obtained by the physician, the home seemed unsuited for the best development of the child. When it has not been possible to render the home suitable for the child, or in instances when there is not one available, the splendid co-operation of the various child placing agencies in finding suitable homes and their continued supervision of the children in the foster homes has been invaluable.

The home of every baby has been visited within the first twenty-four hours after its discharge from the hospital in all cases admitted for regulation of feeding, or where the feeding was at all difficult to understand, or when for any other reason it seemed that we could be helpful to the mother in showing her every detail of the child's care, particularly demonstrating the preparation of the formula. As formerly, every mother is given by the hospital enough feeding to bridge over the time until the worker can visit the home. It has been possible to carry out this plan in the outlying districts through the generous co-operation of the public health nurses.

A great assistance in the work has been the organization of a Special Discharge Clinic in The Children's Hospital Out Patient Department, to which the mothers are asked to bring the babies discharged from the Infants' Hospital during the previous week. The mothers co-operate splendidly, thus making this clinic a great success.

Recently a new social worker has been added to The Children's Hospital Medical Out Patient Staff. One of her duties is to supervise the home care of the babies attending the Medical Out Patient. After the physician in charge of the Special Infants' Hospital Discharge Clinic decides that a baby will probably do well without further hospital care, that baby is now transferred to this new worker, thus releasing the Infants' Hospital worker for the pressing problems of the babies still in the hospital.

In addition to the educational and medical follow-up work, a certain proportion of the cases followed present complicated family situations which require intensive endeavor on the part of the worker in her attempt to help the family get back to functioning in a normal manner. These cases are very time-consuming and often very discouraging, but in looking back over the year instances can be recalled where definite gains have been made, and thus the time so spent has been profitable because social maladjustment in a family is frequently the underlying cause of sickness and admission to the hospital, and later re-admission, if the condition has not been corrected.

One of the problems has been the delay in gaining admission to a tubercular hospital for babies definitely diagnosed as having tuberculosis, and it has also been very difficult to secure proper care for babies who show tubercular tendencies, but who at the present time have not pulmonary tuberculosis, and so are not eligible to the existing institutions.

Due to the generosity of the Ladies' Aid in financing the plan, the worker has been permitted to use her Ford car, which has facilitated the work to a very great extent. The loyal support of the Social Service Committee of the Ladies' Aid has been a constant source of inspiration in the work.

The Committee has held regular monthly meetings during the year with the exception of the summer months. During the summer recess the Chairman is in constant touch with the department.

The affiliation with The Children's Hospital Social Service Department has proved both inspiring and constructive to our work. Encouraged by this example we have made an important change in our policy and now base the after care of the baby upon its medical condition rather than the financial standing of the parents. This has already shown economical and highly satisfactory results.

ALICE HOMANS,

## REPORT OF THE SECRETARY

---

During the past year the Ladies' Aid Committee has held its regular meeting from October to May, and at the annual meeting in May the foregoing officers were re-elected.

When the hospital moved into its new building the Committee through the generosity of one of its members gave a tea to celebrate its formal opening.

The various activities of this year have brought in the following amounts:

\$5,741.69—the proceeds of the Cabaret directed by Mrs. Theodore Frothingham, Jr.

917.34—the proceeds of the Doll Sale directed by Mrs. John T. Wheelwright.

500.00—a check from the Boston Cat Club, which includes a donation of \$34 augmenting the receipts from their annual show given once more for the benefit of the hospital.

135.00—a gift from the Sewing Circle of '97.

400.00—in annual dues from Active and Inactive members.

The committee has paid:

\$6,554.68—to equip and furnish the new hospital building.

1,400.00—the salary of the social service worker plus the cost of garage, upkeep and mileage of her Ford car.

300.00—the yearly endowment of the Ladies' Aid Bed.

300.00—an ultra violet ray lamp to be used for special treatments.

16.11—for books on diatetics and the care of children.

109.00—to finance the new arrangement for the training of the nursery maids under the direction of the Household Nursing Association and the Convalescent Home of The Children's Hospital.

1,008.24—paid for one year's hospital supplies such as blankets, gowns, diapers, sheets, spreads, and garments made up by the Cutting Committee.

Leaving balance on January 1, 1924, of \$918.95.

KATHARINE PUTNAM,

*Secretary.*

## REPORT OF COMMITTEE ON NURSE-MAIDS

---

The Committee on Nurse-Maids of the Infants' Hospital is able to report a new and much improved training for nurse-maids. The details and schedule having been most ably prepared by Miss Shepherd of the Household Nursing Association. The first month of the one year training is spent at the Household Nursing Association on Newbury Street, where cooking, laundry, cleaning, sewing, elementary hygiene and physiology are taught. The pupils are then distributed to the Ruggles Street Day Nursery, Community Health Association, North Bennett Street Industrial School, the Convalescent Home of The Children's Hospital and the Infants' Hospital. The Peabody Home for Crippled Children is interested and anxious to try the nurse-maids. It is hoped that some of the affiliated organizations will contribute towards the cost of the training, as at present it is divided equally between the Infants' Hospital and the Convalescent Home.

A class consists of twelve to fourteen girls, each paying \$25.00 towards the \$225.00 for the course. Each nurse-maid after graduation should be prepared to care for infants and children up to ten years old. The course is far more comprehensive than before. Upon graduation, a diploma is given signed by a representative of the Household Nursing Association, The Children's Hospital and the Infants' Hospital.

Your Committee hopes the nurse-maids will meet the most exacting requirements and will be able to accommodate in times of illness, or when the regular children's nurse is ill or absent. They will register at and be placed from the bureau at the Household Nursing Association which will keep their references and control the wages the first year after graduating. The spring class is practically filled and there is every reason to believe the hardest part of the organizing of the classes is now over and it will continue to go more and more smoothly.

MRS. SAMUEL D. WARREN, JR.,

*Chairman Committee on Nurse-maids  
of the Infants' Hospital.*

---

The Wet Nurse Directory, at 63 Binney Street, Boston, was established by Dr. F. B. Talbot in 1910 and has been under the direction of the Infants' Hospital since 1914.

The object of the Directory is to supply mothers' milk to babies who are ill or who, for some reason, are deprived of their own mother's milk.

It also affords an opportunity for unmarried or deserted mothers to keep their babies with them and earn good wages, one of the rules being that the baby shall not be separated from its mother.

The mother and baby are examined by an Infants' Hospital physician and no case is accepted unless it is found to be free from infections or contagious diseases.

The girls receive \$8.00 a week and they supply us with drawn breast milk which enables us to fill many calls for milk and have varying amounts to give away.

All that is not ordered or sold by a certain time each day is sent to the Infants' Hospital.

The charge for a wet nurse is \$20.00 a week, if taken to the home and \$30.00 a week, if maintained at the Directory. Drawn breast milk may be obtained at the Directory for 25c an ounce.

A room is especially equipped as a milk room, where milk is drawn and poured immediately into sterile bottles and iced.

The Infants' Hospital is supplied with 21 ounces daily and our surplus milk is also sent to the Infants' Hospital.

The expenses of the Directory are necessarily large, owing to the need of so much personal attention and training for the girls and the necessity of much nourishing food.

When a wet nurse is no longer to nurse a baby, she is helped to find other work, usually through the society from which she came to us. During 1923, there were sent out from the Directory 41,485 ounces of milk; of this 12,278 ounces were given to the Infants' Hospital and individuals.

Fourteen mothers were admitted. Five were rejected for various reasons, mostly insufficient milk. There were eighty-nine calls for milk and twenty-nine calls for nurses.

The maternity homes and maternity wards in hospitals have actively co-operated with us in sending mothers to the Directory.

An appeal was sent out by the Committee in March and was met with a generous response, but our need for funds is great, and in your gifts for charities this year, we hope you will remember the Directory for Wet Nurses.

ELIZABETH OLMSTED.  
SUPERINTENDENT

# INFANTS' HOSPITAL

## Forty-Second Annual Report

January 1, 1924 to January 1, 1925

# INFANTS' HOSPITAL

300 LONGWOOD AVENUE, BOSTON

---

INCORPORATED JANUARY 19, 1881

Forty-Second Annual Report

January 1, 1924 to January 1, 1925

THE INFANTS' HOSPITAL extends to infants not over two years of age medical treatment without regard to sex, race, creed, color or residence.

Emergency cases will be admitted at any time if a vacancy exists. Questions in regard to such cases and other matters of information may be referred by telephone to the Hospital at any time. Telephone Regent 5930.

An affiliated course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital, in affiliation with other organizations, provides instruction for nursery maids. Applications for graduate nursery maids will be received by Household Nursing Association, 222 Newbury Street, Boston, telephone Back Bay 7350.

The Wet Nurse Directory at 63 Binney Street, Boston, is affiliated with the Hospital. Telephone Regent 2930.

Relatives are admitted to the wards on Sundays from 10:30 to 12:00 o'clock.

# INFANTS' HOSPITAL

---

## TO OUR CONTRIBUTORS

---

The generous response to our appeal has made possible a most satisfactory report of the year's work and it is hoped that many will be interested in reading the accounts of the different departments, especially that of the Medical Director, Superintendent, Social Service Department and the activities of the Ladies' Aid Committee.

The Directors feel that the report justifies the hope of its founders that the Hospital would fill a great need in this city in the saving of infant life. They trust that the same generous support of the work will be accorded in the coming year.

## REPORT OF THE MEDICAL DIRECTOR FOR 1924

---

In the year 1924, six hundred and fifty-four (654) infants have received care in The Infants' Hospital. This is an increase of one hundred and five (105) patients over the number of admissions in the previous year. The average days' stay in the Hospital was twenty-four (24) days as compared to twenty-five (25) days in 1923. These figures indicate, when it is remembered that there are only fifty-five (55) beds, that the resources of the Hospital are being utilized in a most efficient manner.

Sixty-six (66) premature infants have been treated during the past year, and although the results have been gratifying, it is hoped by the installation of a system in the premature rooms, by which a constant temperature and humidity may be maintained, that even better results may be obtained. The installation of this air conditioning system has been made possible through the generosity of the Ladies' Aid Society.

The Ladies' Aid Society has also been instrumental in making it possible to purchase woman's milk, in quantity. It can be said that by their aid in this direction the lives of many infants have been saved.

There is reason to believe that valuable information which will be of benefit in the treatment of severe nutritional disturbances has been secured through the close affiliation with the investigative side of the Medical Department.

It is encouraging to see how promptly infants return after their discharge from the Hospital when they have failed to do well at home. This is due to the excellent work of the Social Service Department.

The Medical Staff appreciate the close co-operation and assistance which has been afforded them in their efforts to improve the efficiency of their work.

KENNETH D. BLACKFAN,  
*Medical Director.*

## REPORT OF THE SUPERINTENDENT

---

In presenting the first complete year's report of the Infants' Hospital since coming under the direction of 'The Children's Hospital, we feel the importance of keeping always before the public our high aims and standards. The Hospital is one of the best equipped in the country for the care of sick babies, and its connection with The Children's Hospital has been of great benefit to both institutions.

Opening with a capacity of fifty beds, we soon found it necessary to ask for increased accommodations, and we now have a fifty-five bed Hospital. The cubicle system in use has prevented any spread of the infectious disturbances which occur so frequently in infancy, and gives the medical students as well as nurses the technique of individual precautions, which is of especial value to them in caring for any contagious disease.

A daily average number of forty-five patients were treated during the year, and although the death rate seems high, it must be remembered that the greater number of these were put on the dangerous list immediately on admission, and many were moribund when entered.

The splendid spirit of co-operation has continued, and the generosity of the Directors and the Ladies' Aid Committee in granting requests for new equipment is fully appreciated. Electric fans, heaters and heater stands were purchased during the year, and the Hospital was equipped with ventilators and awnings, all of which were very essential. A medicine cabinet requested by the doctors was donated for the Research Ward by Mr. Gannett, and Mrs. Edgar N. Wrightington very kindly donated some special equipment for this same Ward. Mrs. George E. Warren donated a typewriter and also a bottle sterilizer, capable of sterilizing five hundred bottles at a time, and also so constructed that it can autoclave the entire daily amount of milk (15 gallons) at one time. This is a great time saver over the old procedure, and makes the routine duties simpler. As in former years the Ladies' Aid Committee donated all the linen.

The same arrangements still hold with the Wet Nurse Directory and the Household Nursing Association, and are most satisfactory and desirable. The trained nursery maids seem very much in demand, and fill a long felt want in the community, in addition to the service they render to the Hospital. The nursing staff of the Hospital consists of the following:

- 1 Graduate day supervisor
- 1 Graduate night supervisor
- 1 Graduate in charge of Food Laboratory
- 1 Graduate in charge of Treatment Room
- 2 Graduate Head nurses (one on each floor)
- 22 student nurses. (average)

The administration feels grateful to the Board of Directors, Ladies' Aid and Medical Staff for their constant and hearty co-operation. Very few weeks go by without some one of the Directors or Ladies calling up or making a visit to see what our wants are, and their support has been unfailing. The one pressing need is the installation of a ventilating system in the Premature Ward. This has been requested by the doctors, and has been presented to a committee.

Following are the Medical Statistics of the Hospital for the year ending December 31st, 1924:

#### REPORT OF THE INFANTS' HOSPITAL, 1924

Number of patients remaining in the Hospital, December 31, 1923 .....	47	
Number of patients admitted during the year 1924.....	654	
Number of patients discharged during the year 1924.....		663
Number of patients remaining in the Hospital, December 31, 1924 .....		38
	701	701
Total number of Hospital days.....	16,552	
Average number daily .....	45+	
Average days' stay per patient.....	24+	
Number of patients—Pay (\$10.00) .....	283	
Number of patients—Part Pay .....	318	
Number of patients—Free .....	62	
Discharged:		
Relieved .....		433
Unrelieved .....		3
Transferred to other hospitals.....		54
Discharged on parents' own responsibility, or against advice .....		17
Died .....		156
Remaining in the Hospital, December 31, 1924.....		38
		701
Total.....		701

IDA C. SMITH,  
Superintendent.

## REPORT OF THE SOCIAL SERVICE DEPARTMENT

### COMMITTEE FOR 1925

MRS. JOHN HOMANS, JR., *Chairman*

MRS. OLIVER AMES, JR.

MRS. WALLACE GOODRICH

MRS. HOMER B. RICHARDSON

MRS. THOMAS S. BLUMER

MRS. R. G. WADSWORTH

MRS. STEPHEN W. SLEEPER

During the past year there have been 252 cases followed by this Department, and 916 visits made to homes, relatives, interested individuals and agencies, in behalf of the patients. The work of the Department has been conducted by a full time worker, full time secretary, and a volunteer who has given one day a week except in the summer months. The work has been conducted along the same plan as formerly. Many have been followed because of their medical conditions and a few have presented frank abnormal social situations.

A striking number of patients have come from outside the Metropolitan area. When these babies have needed medical follow up they have been referred to the local Public Health nurses, following our policy of not duplicating work where standardized agencies are found. We have received many very gratifying reports from these nurses regarding our former patients.

The Special Discharge Clinic, to which the mothers are asked to bring their babies one week after discharge, has been a marked success. The attendance has been almost 100 per cent.

The helpful cooperation of Miss Chester in The Children's Hospital Out Patient Department, has been invaluable to the Infants' Hospital Worker. Once the contact is established in The Children's Hospital Out Patient Department, the Infants' Hospital Worker leaves the entire follow up of the case to Miss Chester.

Comparatively few babies have been re-admitted, - a real proof of the efficiency of the follow up work done.

The Emergency Fund, furnished by the Ladies' Aid, has been used sparingly, but in the instances where it has been utilized, the aid was most necessary and of great benefit.

Regular meetings of the Social Service Committee have been held before the monthly meeting of the Ladies' Aid. These meetings have been of special interest because there have been conferences between the committee and the worker.

ALICE HOMANS,  
*Chairman Social Service Committee*

## REPORT OF THE SECRETARY

---

During the past year the Ladies' Aid Committee has held its regular meetings from October to May and at the annual meeting the foregoing officers were elected. In October Mrs. Francis I. Amory became Treasurer and Mrs. Eliot became Chairman of the Nursery Maids' Committee.

Mrs. Samuel Warren has arranged informal weekly teas for the Nurses at the Nurses Home to be given by members of the Infants' Hospital Ladies' Aid and by members of the Children's Hospital Welfare Committee.

This year the Hospital has been fortunate in having several specific needs generously supplied. Mrs. George Warren gave a much needed milk bottle sterilizer which would have cost the Ladies' Aid Committee \$475. Mr. Thomas B. Gannett gave a new medicine chest. Mr. Bayard Warren gave a very good Sealyham Terrier to be sold at the Doll Sale.

The various activities of this year have brought in the following amounts:

\$2500.00—The proceeds of the Cabaret directed by Mrs. Homer B. Richardson.

1343.00—The proceeds of the Toy Sale directed by Mrs. Frederick W. Eaton.

1525.00—The Infants' Hospital share of the entertainment given at Magnolia for the Infants' Hospital and the North Shore Babies' Hospital.

1000.00—The proceeds from the Gilbert's Grocery Sale.

490.00—Dues and gifts from active and inactive members—  
 Mrs. W. A. Parker gave \$25.00  
 Mrs. L. A. Frothingham gave \$25.00  
 Mrs. Houghton Metcalf gave \$10.00

500.00—A check from the Boston Cat Club who have once more given the receipts from their annual Cat Show to the Infants' Hospital.

150.00—Profits from the Sale of Snow Bloomers.

The Committee has paid:

\$1400.00—The salary of the Social Service worker plus the cost of garage upkeep and mileage of her own Ford car.

1200.00—Yearly supply of mothers' milk.

188.16—Extra supply of mothers' milk.

1200.00—Infants' Hospital share in the Nursery Maids' Training Course.

400.00—To equip five new beds.

300.00—The yearly endowment of the Ladies' Aid Bed.

1084.01—Paid for one year's hospital supplies: such as gowns, sheets and garments made up by the cutting committee.

50.00—For 50 small blankets for the cribs.

Leaving us with a balance on January 1, 1925 of \$3311.

KATHARINE PUTNAM,  
*Secretary*

## REPORT ON NURSES' TEAS

---

At a meeting of the Ladies' Aid Committee of the Infants' Hospital, held in October, it was decided to give a series of teas for the Nurses of the Infants' Hospital and the Children's Hospital.

Mrs. John S. Lawrence was elected Chairman having been in charge of similar teas at the Massachusetts General Hospital which have been very successful.

Mrs. Francis Crowninshield is chairman for the Children's Hospital teas, and a lady from the committee of each Hospital volunteers to take charge of the tea every Thursday. The first tea in December was attended by about thirty-five nurses, and all subsequent teas by about fifty to fifty-five nurses or the largest possible number off duty at those hours. This proves to the Committee the teas are worth continuing. Mrs. Lawrence having gone abroad, Mrs. Samuel D. Warren was elected to take her place and render a report.

REPORT OF THE COMMITTEE  
ON NURSEMAIDS FROM THE INFANTS' HOSPITAL  
1924

---

The Committee on Nursemaids from the Infants' Hospital is able to report that the training course has been successful enough to warrant its continuation for another year.

At present there are two classes, both of which started in 1924, and the seventeen students are doing good work at the Convalescent Home, the Infants' Hospital, the Ruggles St. Day Nursery, and the Morgan Memorial's Day Nursery. During the last year ten girls have graduated and were promptly placed by the Household Nursing Association, which agency has also followed up their work, and we have been much gratified to find that they have all given satisfaction. We are trying to set a high standard for their work, and to have only a very responsible type of girl in the classes, so that anyone applying to the Household Nursing Association, for one of our nursemaids, may be assured of finding a reliable, well-trained girl. Like all new ventures we have found that it needed some advertising, but we feel confident that when it becomes better known, there will be more applicants for the course, than we can easily care for.

During the autumn it was found to be more convenient to temporarily discontinue the affiliation with the North Bennett Street Industrial School and to substitute the Morgan Memorial. During the most of the year the Convalescent Home, which shares with the Infants' Hospital the expenses of the training, has had ten girls, and the Infants' Hospital three or four.

It has been found that the training can be continued without costing either Institution more than they would ordinarily pay to have the same amount of work done.

We ask for the continued interest and co-operation of our friends, as we hope eventually to become a recognized and helpful part of the community. Many thanks are due to the Household Nursing Association, who have given invaluable assistance and to the other organizations with whom we are affiliated in this interesting work, for the splendid co-operation which makes its continuation possible.

Respectfully submitted,  
Signed: ANNE B. ELIOT.

MAYNARD LADD, M. D.	FRITZ B. TALBOT, M. D.

The Wet Nurse Directory at 63 Binney Street, Boston, was established by Dr. Fritz B. Talbot in 1910, and has been under the direction of the Infants' Hospital since 1914.

The object of the Directory is to supply mother's milk to babies who are ill or who, for some reason are deprived of their own mother's milk.

It also affords an opportunity for unmarried mothers or deserted wives, to keep their babies with them and earn good wages; one of the rules being that the baby shall not be separated from its mother.

The mother and baby are examined by an Infants' Hospital physician and no mother is accepted unless she is found to be free from infectious or contagious diseases.

The girls receive \$8.00 a week and they supply us with drawn breast milk which enables us to fill many calls for breast milk. The surplus milk is given away.

The charge for a wet nurse is \$20.00 a week, if taken to the home, and \$30.00 a week if maintained at the Directory. Milk is sold at 25c per ounce. A room is especially equipped for a milk room, where milk is drawn, and poured into sterile bottles and iced.

During the year 1924, 25,996 ounces were sold; 8913 ounces were given away. There were eighty-four calls for milk and fourteen calls for nurses. Nineteen nurses were admitted and three rejected as too frail for our work.

ELIZABETH OLMSTEAD,  
*Superintendent.*

### AGREEMENT WITH INFANTS' HOSPITAL

---

The Directory for Wet Nurses promises to supply twenty ounces of milk daily from the Directory to the Infants' Hospital, in exchange for Medical Treatment in the Infants' Hospital. They are to supply fifty ounces pooled milk daily for the sum of \$2184 for the year. \$1400 of which is to be paid by the Ladies' Aid; \$784 to be paid by the Infants' Hospital. Any shortage in the milk supply will be refunded to the Infants' Hospital at the rate of twelve cents per ounce. The work is under the supervision of The Children's Hospital Social Worker, Miss Wilson, who is assisted by a Community Health nurse paid for by the Directory for Wet Nurses. The new program began January 8th, 1925, and is working out very satisfactorily. A detailed report will be submitted at the next meeting.

ELISE P. SORTWELL,  
*Chairman.*

## DIRECTORY FOR WET NURSES, INC.

### RECEIPTS AND DISBURSEMENTS

January 1st to December 31st, 1924

FORM OF BEQUEST

---

*To the Corporation*

I give and bequeath to the INFANTS' HOSPITAL, a corporation established under the laws of the Commonwealth of Massachusetts, the sum of . . . . .

# INFANTS' HOSPITAL

## Forty-Third Annual Report

January 1, 1925 to December 31, 1925

# INFANTS' HOSPITAL

300 LONGWOOD AVENUE, BOSTON

---

INCORPORATED JANUARY 19, 1881

## Forty-Third Annual Report

January 1, 1925 to December 31, 1925

THE INFANTS' HOSPITAL extends to infants not over two years of age medical treatment without regard to sex, race, creed, color or residence.

Emergency cases will be admitted at any time if a vacancy exists. Questions in regard to such cases and other matters of information may be referred by telephone to the Hospital at any time. Telephone Aspinwall 5930.

An affiliated course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital, in affiliation with other organizations, provides instruction for nursery maids. Applications for graduate nursery maids will be received by Household Nursing Association, 222 Newbury Street, Boston, telephone Back Bay 7350.

Relatives are admitted to the wards on Sundays from 10:30 to 12:00 o'clock.

## REPORT OF THE MEDICAL DIRECTOR FOR 1925

---

A resume of the activities of the Infants' Hospital for the year 1925 shows that a larger number of patients were treated than in 1924 (841 patients as compared to 654 patients) and that the average stay in the hospital was shortened from 24 days in 1924 to 19 days in 1925. These figures directly point to the fact that the services of the hospital are being extended to an increasingly large number of sick patients. Through the Social Service Department every effort is made for close co-operation with the Child Health centers of the city and the practising physicians. By these means it is hoped that the resources of the hospital may be utilized to their fullest advantage.

This year 221 infants died. This seemingly is a high mortality rate but it should be remembered that the hospital admits patients to its wards freely without regard to the serious nature of their illness, and that 42% of the total deaths occurred in patients who were in the hospital less than 48 hours. Many of the deaths could not have been prevented, however a greater effort should be made to bring infants suffering with preventable diseases as nutritional disturbances, prematurity, melena, intussusception, meningococcus meningitis, etc. to the hospital *earlier*, so that the advantages of hospital treatment may be secured.

The Mary Eliza Bartlett premature ward has been improved by the installation of an air conditioning system whereby a constant temperature and humidity can be maintained and by new equipment designed especially for caring for this type of patient. The capacity of the wards has been increased from 7 to 10 beds. It is believed that with these added improvements it will now be possible to give premature infants the highly specialized care that they require.

A special room has been equipped for the purpose of giving infants with rickets, tetany, tuberculosis, etc., the advantages of Ultra Violet light therapy. In this "light room" Ultra Violet lamps have been arranged so that six infants may receive treatment at one time. This permits of a considerable saving of time and effort from the point

of view of nursing, there is less danger to the patients from over exposure of light and such an arrangement conserves the curative powers of the lamp.

It has been shown recently that whereas the beneficial effects of the direct sun's rays fail to pass through ordinary window glass that they do pass through quartz glass. In order to have the benefit of these curative rays for the purpose of study and treatment a window especially constructed of quartz glass has been placed in the Clarence John Blake Research ward. A number of interesting and valuable studies have been carried through successfully in this room during this past year.

A complete photographic outfit has been placed in the students' laboratory so that a permanent record of all patients treated can be made. In this way a collection of pictures can be begun which should serve a most useful purpose in teaching. In this laboratory facilities also are being developed for the special study of diseases of the blood.

Full acknowledgment is made of the services rendered by the members of the Medical and Nursing Staff together with the interest and generous support given by the Ladies' Aid Society and the Superintendent of the Hospital.

KENNETH D. BLACKFAN, M.D.,  
*Medical Director.*

## REPORT OF THE SUPERINTENDENT

---

In submitting the report of the Infants' Hospital for the year 1925, a comparison of the figures with last year is interesting. There were 841 admissions in 1925 as against 654 in 1924, or an increase of 187 admissions. The number of deaths were correspondingly larger, and of the 221 deaths in the year we find the following facts:

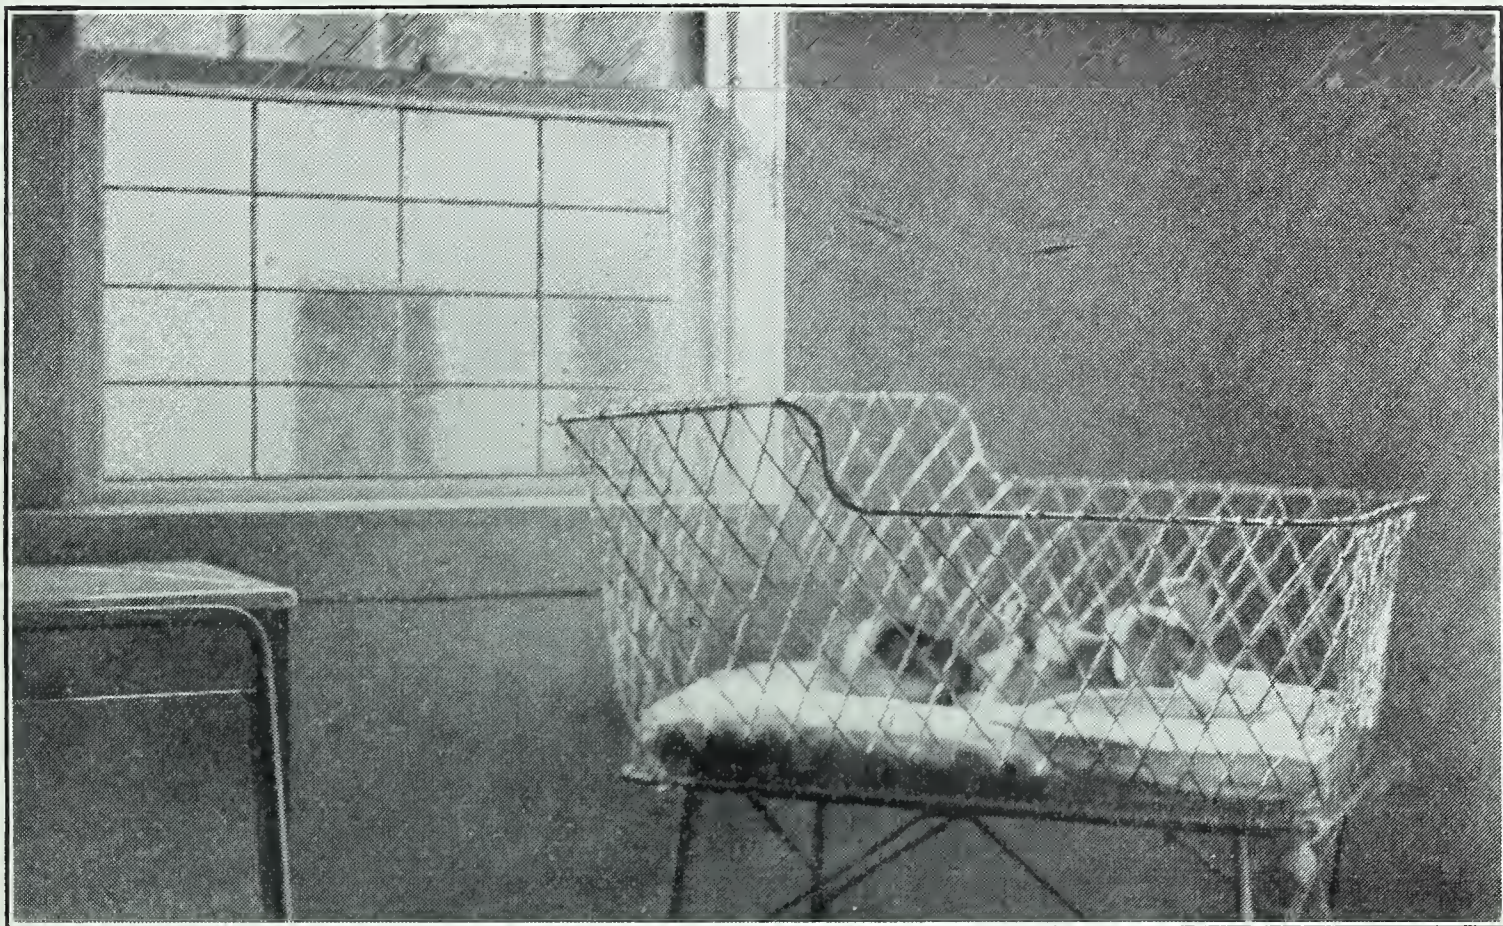

25 patients died a few hours after entrance  
47 patients died in less than 24 hours  
23 patients died in less than 48 hours —

or 42% of the deaths were patients who stayed less than 48 hours. It is felt that some of the deaths among the premature babies were the result of colds contracted in being brought from the homes to the hospital, and in order to overcome this danger a special thermos basket has been ordered by the hospital which will be loaned to the parents or doctors when they call the hospital to admit the babies. The yearly receipts from board of patients show a fairly substantial increase over 1924.

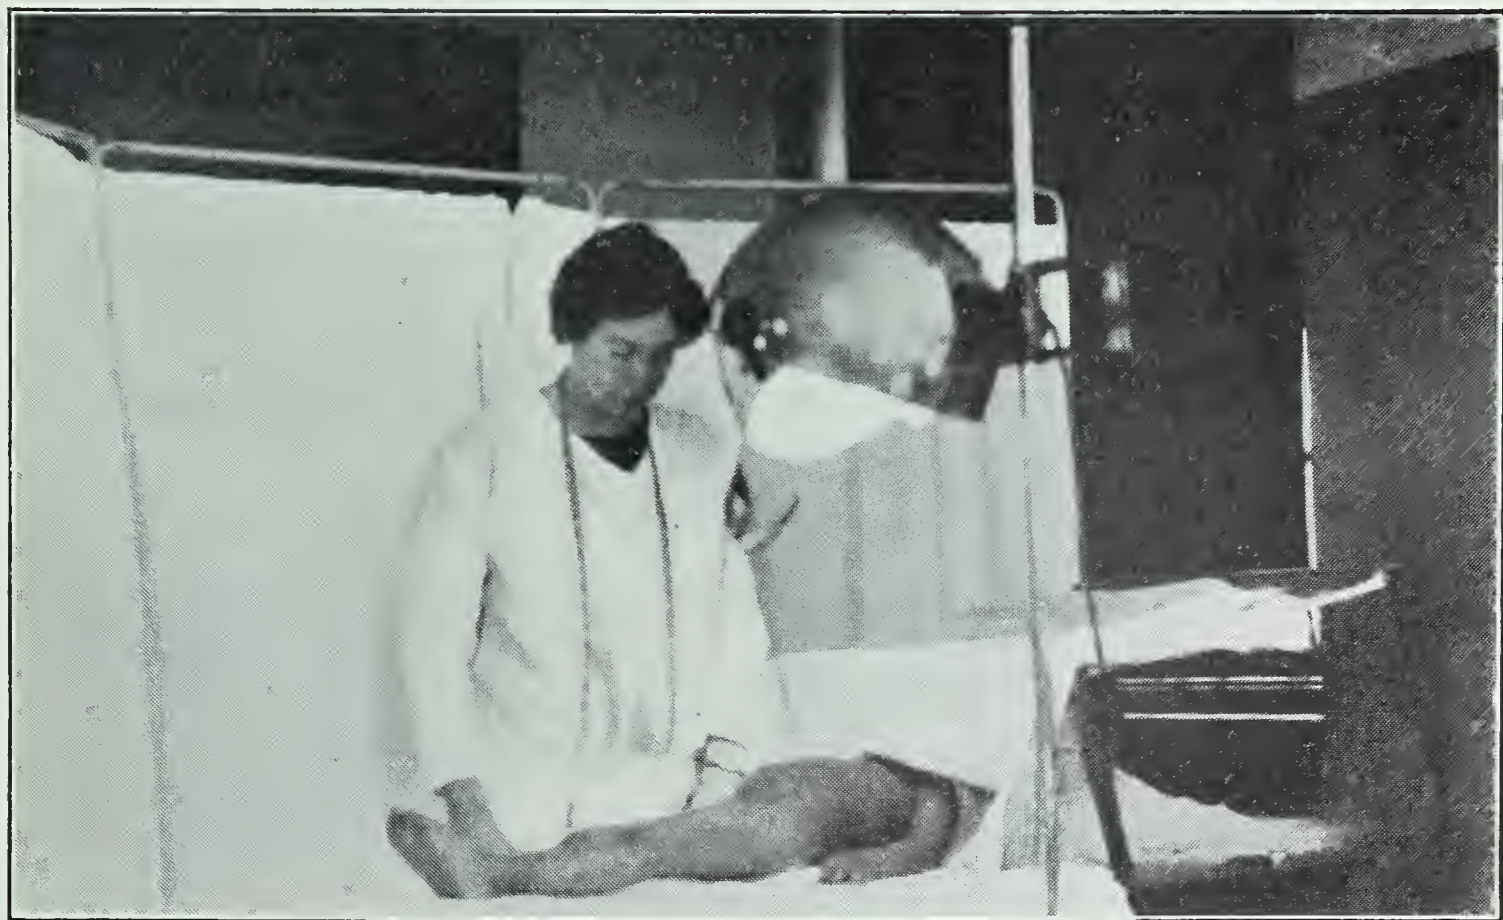

Two of the outstanding features of the year were the installation of a ventilation system in the Premature Room and the transforming of one of the rooms on the first floor into a Light Room. The Light Room is used by both The Children's and Infants' Hospitals, and is of great benefit to the patients. This room was made possible through the generosity of Mrs. Edgar N. Wrightington, who has been a regular contributor to The Children's Hospital, and gave \$1000 to be used at the discretion of the Superintendent for the most pressing need of the patients. At the time, such a room, which would take care of the needs of both hospitals, seemed most essential. Dr. E. T. Wyman took care of the balance of the cost, and he was also instrumental in obtaining for us a Quartz window valued at \$600. This window has been installed in the Research Ward and the health of at least one patient can be directly attributed to its use, and numerous babies have been helped by it.

The installation of the ventilation system in the Premature Room required a great deal of preliminary work and the expense was also great, but it is now completely installed and in use, and the doctors feel that it is filling a much needed want. It was necessary to buy certain new furniture for the Premature Room consisting of special type group bassinets, and in this way the bed capacity of the Hospital has been increased from fifty-five to sixty-six.

THE QUARTZ WINDOW

THE LAMP TREATMENT

The Ladies' Aid Committee have been both prompt and generous in responding to all of our needs. One hundred dollars (\$100.) which was given by them has been deposited as a Fund to take care of paying for transfusions and special nurse emergencies in cases where the parents are unable to pay. A new gas range for the Food Laboratory was donated by them, and our linen supply has been amply taken care of by the "Committee for Cutting Garments."

The pupils of the School are most appreciative of the teas which have been given to them on Thursday afternoons by the Ladies of this committee in conjunction with a similar committee from The Children's Hospital.

A linoleum floor was laid in the Recorder's Office, where it was badly needed, and Mr. Gannett very kindly took care of the expense.

After the Scobey Hospital fire last January, we were obliged through an order of the Building Department of the City of Boston, to install a sprinkler system throughout the tunnels, elevators and ward corridors of both the Infants' and Children's Hospitals. The location of these sprinklers were decided upon by inspectors of the above department, and the order to the Grinnell Company was placed through Mr. Coolidge's office. This was taken care of, and on account of many of the walls having been disfigured with pipes, it was necessary to do a great deal of painting.

There has been no change during the past year in the agreement between the Infants' Hospital and the Wet Nurse Directory, but with the beginning of the new year it may be necessary for the hospital to pay at the rate of 12 cents per ounce for the twenty-one ounces formerly given in exchange for medical treatment. It is the plan of the Directory to take care of the mothers in their own homes beginning January 1st, 1926.

The Household Nursing Association still continue to supply the hospital with nursery maids in connection with the course offered by the Association, and thereby render a valuable service to the Hospital, and the Community as well. Each year the training shows marked advancement.

The Nursing Staff of the Hospital remains practically the same and consists of

- 1 Graduate day supervisor
- 1 Graduate night supervisor
- 1 Graduate in charge of Food Laboratory
- 1 Graduate in charge of Treatment Room
- 1 Graduate in charge of Premature Room
- 2 Graduate head nurses (one on each floor)
- 21 Student nurses (average)

The only change during the year was the appointment of Miss Story as Social Worker to take the place of Mrs. Smith who resigned.

The Administration again wishes to express their deep appreciation to the Officers and Directors of the Hospital, and the different Ladies' Committees, who have so generously given their time and assistance in promoting the welfare of the Hospital throughout the year. Without the support of the Attending Staff, House Staff and Nursing Staff, we could not have undertaken, much less carried out, the work that has been accomplished during the year.

The Medical Statistics for the year ending December 31, 1925 are as follows:

Number of patients remaining in the Hospital		
December 31, 1924.....	38	
Number of patients admitted during the year 1925	841	
Number of patients discharged during the year 1925		830
Number of patients remaining in the Hospital		
December 31, 1925.....		49
	<hr/>	<hr/>
	879	879
Number of patients—Pay (\$10.00).....	349	
Number of patients—Part Pay.....	413	
Number of patients—Free.....	68

## REPORT OF THE SECRETARY

---

During the past year the Ladies' Aid Committee has held regular meetings from October to May, and at the Annual Meeting the foregoing officers were re-elected.

The Ladies' Aid Committee gratefully announces that the Boston Cat Club has decided to adopt The Infants' Hospital as a permanent charity and will give it the proceeds of their annual cat show.

The Ladies' Aid Committee is giving the new ventilating plant for the Premature nursery, costing about \$4500.

The informal weekly teas for the nurses at the Nurses' Home given by members of the Children's Hospital Welfare Committee and by members of the Infants' Hospital Ladies' Aid Committee have been very successful and are being repeated this year under Mrs. Wadsworth's supervision.

The Hospital has been fortunate in having some of its smaller needs promptly supplied. Mrs. George Warren gave a much wanted typewriter and Mrs. Bayard Warren gave a \$100 prize to be competed for at the summer entertainment.

The activities of this year have brought in the following amounts:  
\$3,282.85—The proceeds of the Cabaret directed by Mrs. Frothingham and Mrs. Eliot.

1,000.00—The Infants' Hospital share of the entertainment given at Magnolia for the Infants' Hospital, The North Shore Babies' Hospital and the Wet Nurse Directory.

935.38—The proceeds of the Toy Sale directed by Mrs. Richard M. Russell.

443.00—Dues and gifts from active and inactive members.

600.00—Check from the Boston Cat Club, the receipts from their annual Cat Show.

178.00—Profits from the sale of Snow Bloomers.

The Committee has paid:

\$1,500.00—The salary of the Social Service worker.

1,400.00—Yearly supply of mother's milk.

300.00—Yearly endowment of the Ladies' Aid Bed.

626.50—Ford Coupe bought for use of Social Service worker.

98.90—Ford Coupe equipment and insurance.

100.00—Special emergency fund for immediate necessities of the Hospital.

55.00—For special blood transfusions.

796.72—Paid for one year's hospital supplies such as gowns, sheets, and garments made up by Cutting Committee.

62.00—For gas stove.

57.60—Bottle rack.

250.00—Advance payment on entertainment for 1927.

28.00—Silver Bowl given in recognition of unusual service to our departing Social Service worker.

15.00—For coal to Agnes Mahoney, aged chore woman.

66.25—For a tea to meet the Ladies of the Boston Cat Club.

Leaving us with a balance on January 1, 1926 of \$4,353.61.

Respectfully submitted,

KATHARINE H. PUTNAM,  
*Secretary.*

## REPORT OF THE SOCIAL SERVICE DEPARTMENT

---

### COMMITTEE FOR 1926

Mrs. John Homans, Jr., *Chairman*

Mrs. Oliver Ames, Jr.

Mrs. Wallace Goodrich

Mrs. Homer B. Richardson

Mrs. Thomas S. Blumer

Mrs. R. G. Wadsworth

Mrs. Stephen W. Sleeper

The Social Service Committee has held meetings before the regular monthly meetings of the Ladies' Aid Committee. At these meetings the Committee has conferred with the head worker and has been informed of the activities of the department.

In June, Mrs. Anna Smith, the head worker, resigned and Miss Marion Story was appointed in her place. Miss Story took the regular hospital training at "The House of Mercy" in Pittsfield, later taking post graduate courses at The Infants' Hospital, Boston, and The Floating Hospital, Boston. She then served five years with the Baby Hygiene Association of Boston.

Mrs. Smith had given the department the use of her own Ford car for the work. It was found that by this means she was enabled to do twice the work that had been accomplished heretofore. Upon her retirement it was decided by the "Ladies' Aid Committee" to buy a Ford for the department as its services in saving time and strength, and increasing the activities of the worker had been clearly demonstrated.

Respectfully submitted,

ALICE HOMANS,  
*Chairman.*

REPORT OF THE SOCIAL SERVICE WORKER

---

The year 1925 has closed with a record of 181 cases followed—and 980 visits made to the homes of the babies who have been discharged from the Infants' Hospital, or where there has been no available home, to agencies or interested relatives. There has been a smaller number of babies where home conditions have necessitated more frequent visits of oversight, and also there has been a large number of babies where two or three visits have shown the worker that the home care of the baby is proving adequate. The latter have not been considered by the worker to need further supervision, which is one reason to account for the smaller number of cases that have been followed this past year.

There have been fewer social problems to cope with—fewer family entanglements to help in re-adjusting, and in nearly every instance they were cases that very definitely belonged to some one of the child-placing agencies. There were several cases where the agencies sent babies to the hospital and then took them back under their supervision, at the termination of the stay at the hospital.

A large percentage of the patients of the hospital,  $33\frac{1}{3}\%$ —has come from towns outside of Greater Boston, and where it has been possible, or thought advisable, they have been referred to the Public Health organizations in their home towns. These organizations have been very co-operative and helpful—both in giving reports of home investigation, where such reports have been requested, and also in following the baby patients when they have returned home. This relaying the cases to the organizations has prevented duplication of work, and also has made it possible for the worker to spend her time on the bulk of the work nearer at hand. Because of the fewer social problems, the worker has been able to give most of her time to instructive work—demonstrating formula-making, and giving helpful advice, with the hope that such supervision may make it possible that the care that has been expended on the babies during their stay in the hospital may be of permanent benefit.

MARION B. STORY,  
*Social Worker for The Infants' Hospital.*

## REPORT ON NURSES' TEAS

---

Except during the holidays, teas have been held every Thursday afternoon at the Nurses' Home, since the first of November. These teas are conducted in collaboration with the Nurses' Tea Committee of The Children's Hospital Welfare Committee. Mrs. F. B. Crowninshield, Chairman for the first part of 1925, and Mrs. Robert C. Morse, Chairman for the latter part of 1925.

This year the Infants' Hospital has provided two hostesses for nearly every tea, on the advice of Mrs. Ames.

The teas have been well attended, and I am assured by Miss Wakefield, Superintendent of Nurses, have been very much appreciated by our guests. The attendance varies somewhat from week to week, owing to varying class schedules, and hospital work, but allowing for this, the attendance has been very good. The occasions are very pleasant, both for hostesses and guests.

Members of our active Board have been very prompt and kind in volunteering to take the teas, and I should like here to record my thanks to them all.

Respectfully submitted,

MRS. M. H. WADSWORTH.

REPORT OF THE COMMITTEE  
ON NURSEMAIDS FROM THE INFANTS' HOSPITAL  
1925

---

During the year 1925, 31 girls entered the School for Nursery Maids, 13 in April and 18 in August; of this number five were dismissed and six left for various reasons. There are now twenty pupils in training, two having just graduated, the delay being due to illness.

At present there is one at North Bennett St. Industrial School, and one at the Morgan Memorial, four at the Infants' Hospital, ten at the Convalescent Home of The Children's Hospital, and four at the Children's Community Centre of New Haven. They remain in New Haven for nine months taking the first month at the Household Nursing Association and two months at the Infants' Hospital. This new affiliation made during the autumn has thus far proved most successful, the girls getting an excellent training and all expenses are paid by the Children's Community Centre. Owing to this new arrangement the cost per pupil has been reduced \$95.78, and again will be further reduced by the pupils paying for their own uniforms and aprons, a reduction of \$14.00 each.

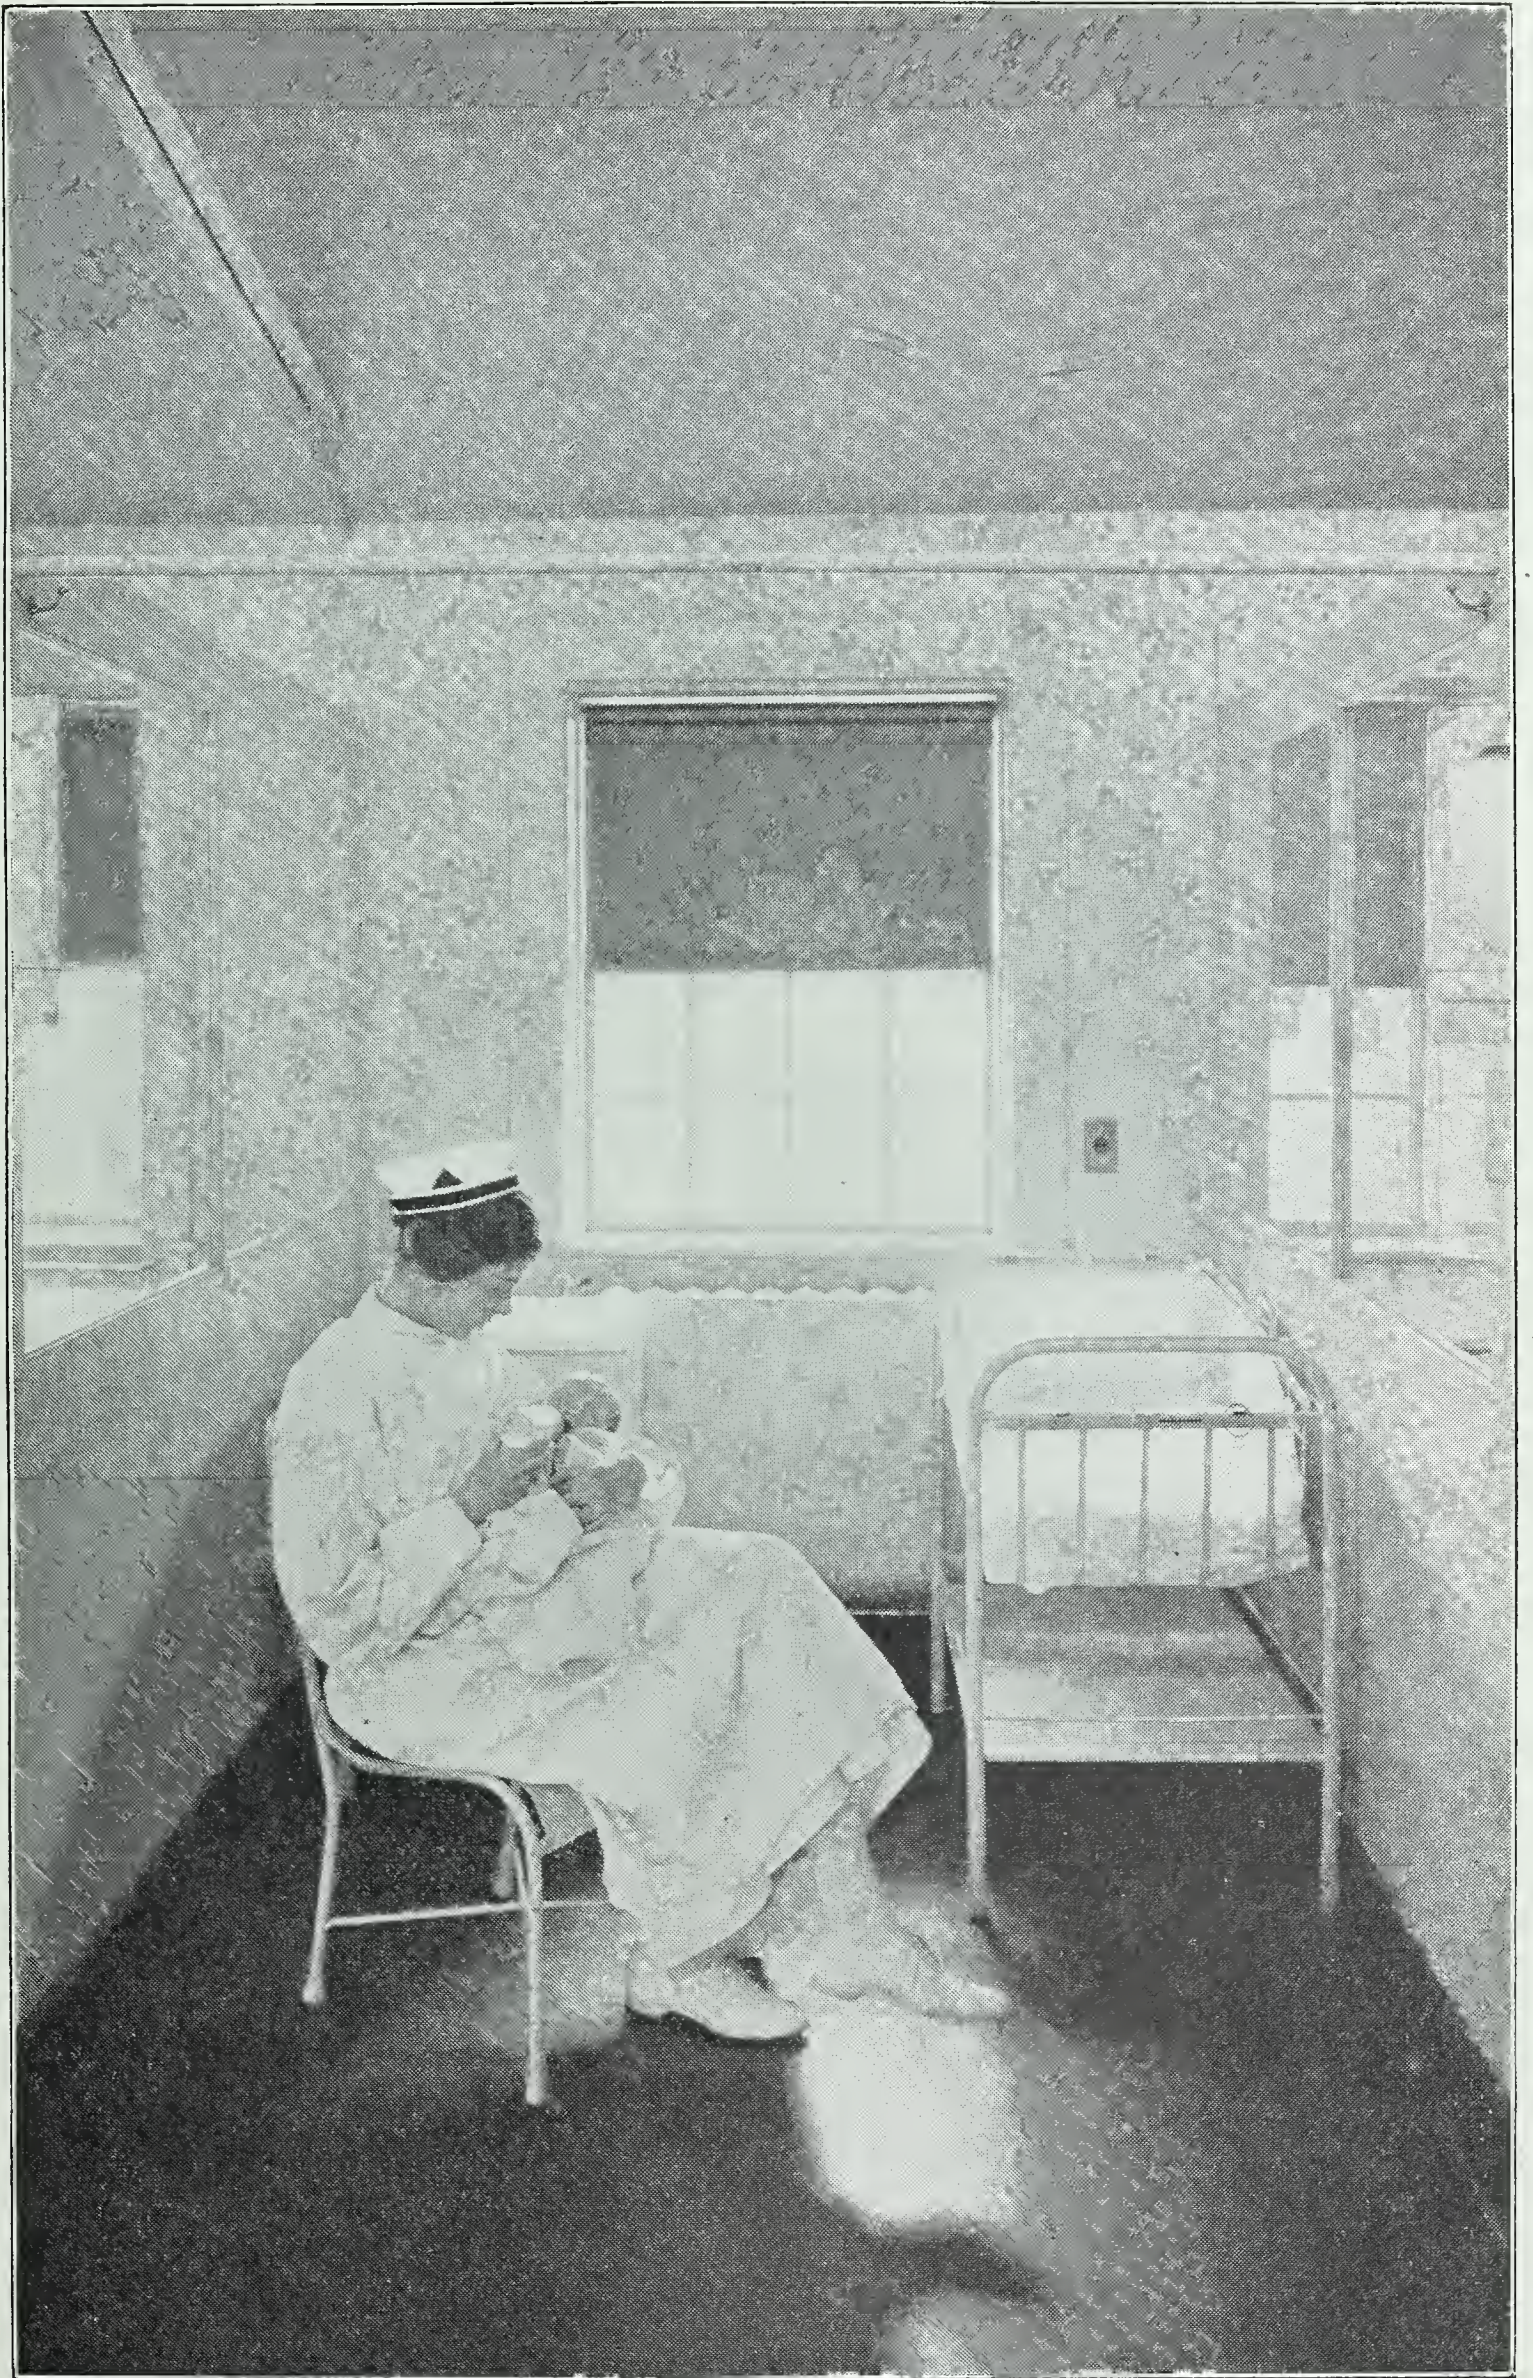

The second graduation of the nursery maid school was held on May 6th at the Convalescent Home of the Children's Hospital in Wellesley. Mrs. Harriman gave the address. The Rev. Guy Miner of St. Mary's Church, Newton, offered prayer and Miss Sheperd told the girls about the beginning of the school.

Four hundred and twenty-three (423) inquiries about the training were received during the year, as against 180 for the year before.

There are 13 girls enrolled for the March class with no advertising which shows that the school is becoming known, and it is expected to easily fill the class as there remains but eight more places, this being the largest class taken in so far.

The Institutions Department of the City of Boston has given \$100.00 to pay the tuition of 4 wards of the Child Welfare Division in training for nursery maids. A special account has been opened at the

BREAKFAST IN A CUBICLE

State Street Trust Company under the name of Scholarship Fund for Nursery Maids.

As each year goes by the work becomes more firmly established, and it is hoped next year to further reduce the cost to the Hospitals. The reports from the employers of the graduates are most satisfactory, giving the Committee encouragement to feel that the work is of some value to the community as well as the girls themselves. There follows a short list of the expenses:

#### TOTAL EXPENSES FOR 1925

Board .....	\$ 837.32	Expenses .....	\$3,907.73
Room .....	508.30	Paid by Pupils .....	685.00
Laundry .....	205.60		<hr/>
Car fares and Exp. ....	153.10		\$3,222.73
Doctor and Medicine .....	15.50	Paid by New Hav. Com. Cen.	383.12
Adv. and Printing.....	160.25		<hr/>
Uniforms .....	521.86		\$2,839.61
Allowances .....	1,452.62	Convalescent Home Share	
Graduation .....	53.18	( $\frac{1}{2}$ ) .....	\$1,419.81
	<hr/>	Infants' Hospital share	
	\$3,907.73	( $\frac{1}{2}$ ) .....	\$1,419.80

Respectfully submitted,

ANNE B. ELIOT.

## REPORT OF DIRECTORY FOR WET NURSES, INC.

---

In giving the report for the Directory for Wet Nurses, it will be necessary first to explain the very radical change we have made.

About a year ago at Dr. Blackfan's urgent request, we started a new work, namely collecting milk from mothers in various parts of the City who had a surplus to give, the names of the mothers being obtained from the "Community Health Clinics." These mothers have had both the "Wassermann" and tubercular tests and received 7 cents an ounce for their milk, we selling it at 12 cents an ounce.

Furthering this work took a great deal of money and we entered into it with great trepidation as to finances. Our initial expenses were very large—having to pay the full time salary of a community health nurse, buying a Ford coupe and equipping the nurse and car with many necessary sundries.

Our initial attempts were only made possible by the great co-operation of the Infants' Hospital, who started us off with the substantial order of 50 ounces per day, and the kind offer of the assistance of their social worker, Miss Wilson, whose enthusiasm, ability, unexhaustible efforts have been an inspiration through many trying moments.

We started out by engaging a nurse, working under the auspices of "Community Health" and the first few months we succeeded only in collecting about on the average of 120 ounces per month. Very discouraged, we rearranged our plans, hired our one nurse, still a community health nurse, but working entirely under our own supervision. We engaged Miss Hunter, to whose versatility may be ascribed a great deal of our ultimate success, for her work has had to involve the knowledge of medicine, mechanics, chauffeuring and expert accounting, not to mention tact, perseverance, patience and untiring endurance. Her success may best be seen by the following figures. When she took over the work, we were furnishing one hospital—namely, the Infants' with 50 ounces a day and not able to do that.

Below, shows the increase in demand by the different hospitals and the quantity of milk collected:

FOR YEAR 1925

Mr. T. L. Ogorman .....	6	
Total.....		5,782

Since this work has progressed so rapidly however, we have had a decided decline in our private orders at the Directory—63 Binney Street where we have always kept five, six or seven mothers with their babies. In fact, the orders have been so few, due of course to the difference in expense per ounce, which has heretofore been 25 cents at the directory, that we have not been fully justified in keeping our building open.

We therefore, with the full approval of all the Doctors, who have formerly used our milk and who have tested this new idea of pooled

milk and find that it meets all the needed requirements, sold our Directory to The Children's Hospital. We have reserved our former milk room as an office and laboratory and from here we intend to carry on our new work with the added help of another full time nurse.

This milk will receive all the necessary fat tests, will be pasteurized, tested as to the possibility of its being watered and will be sold at 12 cents per ounce. Should a private case wish a special mother, we shall always try to be able to provide one and will have to charge 35 cents per oz. for this milk as it will involve much added detail.

We cannot thank the Infants' Hospital enough for its great interest and help and the enormous increase in demand shows what a great need this work is to the City of Boston, without any further advertising on our part.

ELISE P. SORTWELL.

January 22nd, 1926.

---

### AGREEMENT WITH INFANTS' HOSPITAL

---

The Directory for Wet Nurses promises to supply twenty ounces of milk daily from the Directory to the Infants' Hospital, in exchange for Medical Treatment in the Infants' Hospital. They are to supply fifty ounces pooled milk daily for the sum of \$2184 for the year. \$1400 of which is to be paid by the Ladies' Aid; \$784 to be paid by the Infants' Hospital. Any shortage in the milk supply will be refunded to the Infants' Hospital at the rate of twelve cents per ounce. The work is under the supervision of The Children's Hospital Social Worker, Miss Wilson, who is assisted by a Community Health nurse paid for by the Directory for Wet Nurses.

ELISE P. SORTWELL,  
*Chairman.*

# INFANTS' HOSPITAL

## Forty-Fourth Annual Report

January 1, 1926 to December 31, 1926

# INFANTS' HOSPITAL

300 LONGWOOD AVENUE, BOSTON

---

INCORPORATED JANUARY 19, 1881

## Forty-Fourth Annual Report

January 1, 1926 to December 31, 1926

**T**HE INFANTS' HOSPITAL extends to infants not over two years of age medical treatment without regard to sex, race, creed, color or residence.

Emergency cases will be admitted at any time if a vacancy exists. Questions in regard to such cases and other matters of information may be referred by telephone to the Hospital at any time. Telephone Aspinwall 5930.

An affiliated course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital, in affiliation with other organizations, provides instruction for nursery maids. Applications for graduate nursery maids will be received by Household Nursing Association, 222 Newbury Street, Boston, telephone Back Bay 7350.

Relatives are admitted to the wards on Saturdays from 2 to 4 o'clock P. M.

## *REPORT OF THE MEDICAL DIRECTOR FOR THE YEAR 1926*

---

It is of interest in reviewing the activities of the Infants' Hospital to consider the number of patients treated and their average length of stay in the Hospital. By so doing, a general view of the effectiveness of the service is obtained. The summary for 1926 compares favorably with that for 1925. This year there have been 853 patients admitted for treatment, and the average stay in the Hospital was 21 days. The mortality rate of 24% is exactly the same as that of last year. More than half of the deaths occurred within forty-eight hours following admission.

The air-conditioning system in the Mary Eliza Bartlett premature ward, which has been in operation this last year, has proved to be of much practical use. With this system for the regulation of the temperature and humidity, with the highly specialized nursing care, together with the safeguards against infection and the arrangements for securing woman's milk, we are now able to give premature babies the advantages of the methods which are so essential for their proper growth and development. Eighty-two per cent. of these infants thrived so that they were able to be returned to their homes.

Numerous studies have been conducted this past year. The contributions which merit special mention are those concerning the relationship of temperature and humidity to the growth of premature infants, the effects of ultra-violet light on disease, and studies relative to the artificial feeding of infants. It is hoped that the work now in progress regarding the beneficial effects of the sun's rays through Quartz glass, Vita glass, and Corning glass may result in information which will prove of value not only in the construction of sun-rooms in hospitals, but in the modern home as well. These investigations in heliotherapy have been made possible by the assistance and interest of the Ladies' Aid Society.

Although the system of isolation adopted in order to individualize the care of each patient is less economical than systems maintained elsewhere, it seems more than worthwhile in view of the fact that a recent analysis of the infections communicated from one patient to another during the past three years shows that transference of disease in the wards has been reduced to a minimum.

Instruction to medical students, graduate physicians, and nurses, which constitutes one of the important services rendered by the

Hospital, continues as heretofore. This past year a larger number of graduate physicians have been in attendance than previously, and although it has meant an increase in the duties of the medical and nursing staff, every effort has been made to make the work attractive and profitable.

The nursing care offered the patients has been developed to a point of efficiency which reflects much credit to the supervisor in charge and her corps of able assistants. The lessening of contagiousness and the splendid results obtained in the premature ward are directly attributable to their efforts.

As has been mentioned in previous reports, too much emphasis can not be given to the work done by the Social Service Department, which has been functioning actively. This assistance has been most helpful in adjusting the circumstances in the home and in following those patients requiring special care.

The effectiveness of the medical care, as well as the valuable contributions which result from careful study of disease, is dependent to a large extent on the accuracy and accessibility of the records of the patients who have been in the Hospital. Acknowledgment should be made of the efficient manner in which the record system has been organized.

The portable X-ray apparatus which was given by a friend of the Hospital has been used constantly, and it has been of great assistance as a diagnostic aid in the care of those babies critically ill and too enfeebled to be taken to the central X-ray department.

Full credit should be given to the members of the Medical and Nursing Staff, the Ladies' Aid Society, and the Superintendent of the Hospital for the accomplishments of the past year.

Respectfully submitted,

KENNETH D. BLACKFAN,  
*Medical Director.*

## FINANCIAL STATEMENT

PHILIP STOCKTON, *Treasurer*

## REPORT OF THE SUPERINTENDENT

---

The yearly daily average number of patients cared for at the Infants' Hospital has increased from thirty-seven to fifty patients during the past three years, or since its coming under the medical management of the Children's Hospital. Eight hundred and fifty-two patients were admitted during 1926, of which 221 died. Five hundred and eighteen were discharged relieved, and the balance were either discharged to their homes on parents' responsibility, against advice, to other hospitals, or unrelieved. This latter is in the minority. The mortality rate, while high, does not show any increase over last year, although there were more admissions. As in previous years, a special record kept for the information of the doctors shows that 28 patients died within a few hours of admission, 54 died in less than 24 hours, and 24 died in less than 48 hours, or 47% of the deaths occurred in less than 48 hours after the admission of the patient.

The yearly receipts from the board of patients show a very substantial increase over last year, in spite of the fact that there seems to have been a great deal of unemployment among the parents, and a large proportion were entered as either part pay or entirely free patients.

The results obtained from the advanced type of treatment we are able to give owing to the installation of our Premature Room, Light Room, and other special treatment rooms have been most gratifying to the doctors as well as the administration. A portable X-ray machine was purchased during the year through a special fund provided by a friend of the Hospital. This machine is for the use of both the Children's and Infants' Hospitals, and has been most helpful, as we very often have patients who are too ill to be moved, or are moved with great inconvenience. To supplement the use of the Quartz window installed last year, Dr. Wyman has been instrumental in securing windows of Corning and Vita glass, which are very much less expensive, and have been installed in adjoining cubicles to the one in which the Quartz window is placed. Studies are being made as to the different results obtained from the different types of glass, to ascertain the relative comparable values. By continual study and treatment of numerous cases, great advancement has also been made in the problems of nutritional disturbance. Our cubicle system, although necessarily expensive to operate on account of each patient having its very own equipment, is felt by the doctors to be invaluable in checking and preventing almost all danger of the spread of communicable diseases.

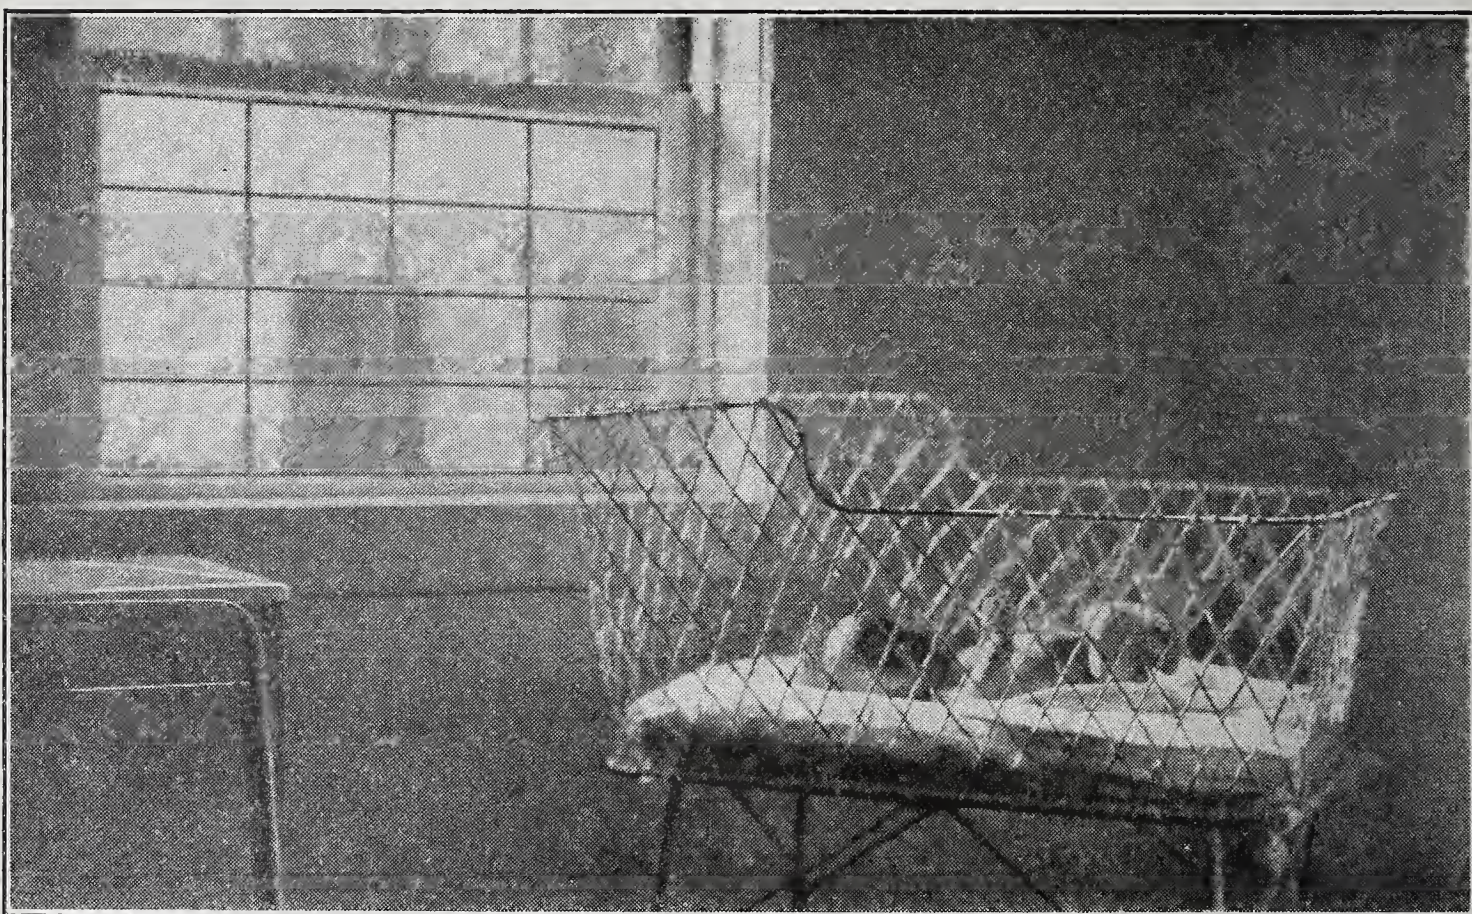

Early in the spring, through the generosity of the Ladies' Aid Committee, awnings were installed on the porches and the Premature Room, and thereby made it possible to keep the wards cool and exceptionally comfortable during the very hot summer days which we had last year. Our next most pressing need is the installation of

screens on all porches. Numerous requests for this have been received from the doctors. As in former years, many items of smaller equipment, such as new food tables, treatment stands, etc., have been immediately given on request by the Ladies' Aid Committee, or other kind friends of the Hospital.

The Household Nursing Association still continues to furnish us with nursery maids who assist in the practical work on the wards, and at the same time receive beneficial instruction to fit them for a much-needed place in the community. Each year sees added courses of instruction, so that the course now is very well established, and has recently added cooking to its curriculum.

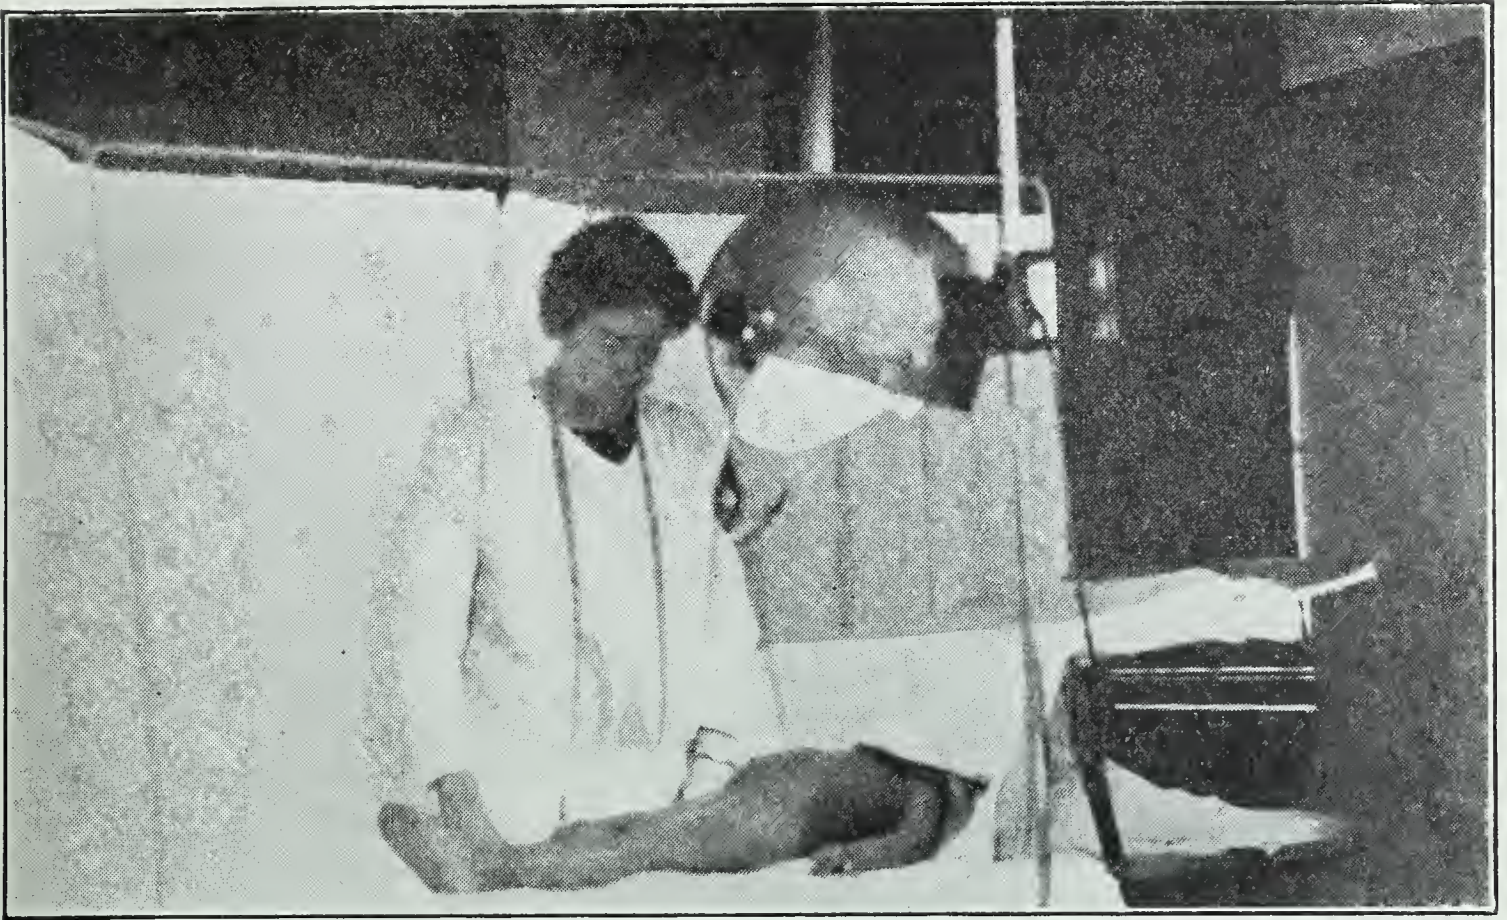

The Wet Nurse Directory moved from 63 Binney Street to 270 Commonwealth Avenue during the year, and has no longer any direct connection with the Infants' Hospital. They will continue, however, to furnish us with our requirements, which seem to average between 60 and 65 ounces per day. From careful observation, after checking amounts of mothers' milk received and used, it is felt that under normal conditions 60 ounces will take care of our needs, but in the event of admitting an increased number of premature babies, it is possible that we may require 70 ounces per day.

THE QUARTZ WINDOW

The working staff of the Infants' Hospital remains practically the same, with the exception of an additional graduate nurse who was required for night duty to supervise and carry out, where necessary, the many treatments. This addition to the staff has met a much-felt want, as a very sick baby requires almost the same care during the night as during the day, and in order to do this a very close supervision is maintained at all times.

THE LAMP TREATMENT

## STAFF

- 1 Graduate Day Supervisor
- 1 Graduate Assistant Day Supervisor
- 1 Graduate Night Supervisor
- 1 Graduate Assistant Night Supervisor
- 2 Graduate Head Nurses (one on each floor)
- 1 Graduate in charge of Food Laboratory
- 1 Graduate in charge of Treatment Room
- 21 Student nurses
- 4 Nursery maids
- 3 Attendants
- 2 Maids
- 2 Porters
- 1 Recorder
- 1 Social Service worker
- 1 Social Service stenographer

With the above staff, we are well equipped to treat our daily average of fifty patients, or as many as sixty when the wards temporarily run to capacity. From the middle of August to the middle of October we have found that there is a sharp increase in the demands on the Hospital due to summer diarrhœa and intestinal disturbances, and the burden on the staff is very great. Doctors and nurses are taxed to the utmost, and in order to carry out the technique and treatments, the doctors have worked many nights. For this reason, it might be well to consider the need of an additional graduate nurse during this period.

The Hospital is deeply indebted and owes whatever growth or success it may have accomplished to the generous and constant support of the Officers and Directors, the Ladies' Aid Committee, and the Staff.

The Medical Statistics for the year ending December 31, 1926, are as follows:

Number of patients remaining in the Hospital Dec. 31. 1925.....	49	
Number of patients admitted during the year 1926.....	852	
Number of patients discharged during the year 1926.....		853
Number of patients remaining in the Hospital Dec. 31. 1926.....		48
	<hr/>	<hr/>
	901	901
Number of patients—Pay (\$10.00) .....	339	
Number of patients—Part Pay .....	452

### COMMITTEE FOR CUTTING GARMENTS

MRS. F. WADSWORTH BUSK, *Director*

## REPORT OF THE SECRETARY

During the past year the Ladies' Aid Committee has held regular meetings from October to May, and at the Annual Meeting the foregoing officers were re-elected.

The Ladies' Aid Committee is very grateful for the special gifts to the Hospital. Mrs. Sherwin Badger has given an X-ray machine, fully equipped, in memory of George Sherwin Badger, which fulfills a long-needed want, and Mrs. Rodolphe L. Agassiz has given two metal-topped tables for the diet kitchen.

The Ladies' Aid Committee wishes to thank the members of the Welfare Committee of the Children's Hospital for their kind co-operation in working for Titania's Palace. The two hospital boards have united on this ambitious project, and it is hoped large sums will be realized. Our warm thanks are also due Mrs. Arthur M. Beale, who was instrumental in securing Titania's Palace for exhibition, and to Mr. William L. Shearer and Mr. William L. Shearer, Jr., who by giving the exhibition space at Paine's Furniture Shop have so generously contributed to its success.

The informal weekly teas for the nurses at the Nurses' Home, given by members of the Welfare Committee of the Children's Hospital and by members of the Infants' Hospital Ladies' Aid Committee, directed by Mrs. Wadsworth, have been very successful.

The activities of this year have brought in the following amounts:

- \$2,886.26—Proceeds of the Cabaret directed by Mrs. Busk.
- 1,130.98—Proceeds from the Toy Sale.
- 441.77—Dues and special gifts from active and inactive members.
- 325.00—Checks from the Boston Cat Club, the receipts from their Annual Cat Show.

The Committee has paid:

- \$3,930.01—The new ventilating plant for the Premature Nursery.  
This is paid from a special fund raised by the Ladies' Aid.
- 1,700.00—Salary of Social Service Worker.
- 1,305.48—Paid for one year's hospital supplies, such as gowns, sheets and garments made up by the Cutting Committee.
- 430.00—Awnings for porches.
- 300.00—Yearly Endowment Ladies' Aid Bed.
- 445.00—Expenses on Ford car for use of Social Service Worker.
- 250.00—For Dr. Wyman's experimental work.
- 250.00—Payment for advance advertising for Titania's Palace exhibition.
- 214.50—For two tables to be used in the Diet Kitchen.

\$ 87.50—Electric Breast Pump.

39.15—Seven Small Breast Pumps.

25.00—Emergency Fund for immediate necessities for the Hospital.

130.00—Christmas and Thanksgiving dinners and year's coal to Agnes Mahoney, aged chorewoman.

Leaving us with a balance on January 1, 1927, of \$3,917.87.

Respectfully submitted,

KATHARINE H. PUTNAM,  
*Secretary.*

## LADIES' AID COMMITTEE FINANCIAL REPORT

MRS. F. I. AMORY, *Treasurer*

January 1st, 1926, to January 1st, 1927

### RECEIPTS:

Balance, January 1, 1926.....	\$4,353.61

## REPORT ON NURSES' TEAS

---

Teas were held weekly in collaboration with The Children's Hospital Committee in January, February and March, 1926, except when repairs to the Home necessitated their omission. The attendance was fair.

Respectfully submitted,

MRS. R. G. WADSWORTH,  
*Chairman.*

---

## REPORT OF THE SOCIAL SERVICE DEPARTMENT

---

### COMMITTEE FOR 1927

MRS. JOHN HOMANS, JR., *Chairman*

MRS. OLIVER AMES, JR.

MRS. WALLACE GOODRICH

MRS. HOMER B. RICHARDSON

MRS. THOMAS S. BLUMER

MRS. R. G. WADSWORTH

MRS. STEPHEN W. SLEEPER

The Social Service Committee has held regular monthly meetings during the winter season. The head worker, Miss Marion B. Storey, has made 953 visits of investigation and instruction to the homes of the babies discharged from the Infants' Hospital. There were two groups of cases made, the first consisting of 201 cases where only one visit was necessary, and the second of 192 intensive cases where the worker called from six to twelve times before she felt the mothers were ready to be left to take the responsibility alone.

About 25% of the admissions have been entered from beyond Greater Boston limits, coming from Southern and Western Massachusetts, with a number from New Hampshire. These have been referred to their local agencies for follow-up work, if necessary, and to some of these agencies letters have been written for information as to the progress of the babies after they have been at home for several months.

Respectfully submitted,

ALICE HOMANS,  
*Chairman.*

---

## REPORT OF THE COMMITTEE ON NURSEMAIDS FROM THE INFANTS' HOSPITAL, 1926

---

The School for Nurserymaids is now in its fourth year. Since its beginning in May, 1923, 111 girls have entered for the training, 35 of these entering in 1926.

There are at present 21 girls in training—4 at the Infants' Hospital, 8 at the Convalescent Home of the Children's Hospital in Wellesley, 5 at the Children's Community Center in New Haven, 2 at the South End Day Nursery, and 2 at Nursery schools. All of these girls have already completed the first month of preliminary training at the Household Nursing Association. The balance, 14 in all, have left the course of their own accord, or have been dismissed for various reasons.

Eighteen girls during the past year were awarded diplomas and are considered to be well fitted for this type of work. The annual graduation was held at 222 Newbury Street (the Household Nursing Association) on June 3rd. The Rev. John S. Moses, of the Church of the Redeemer of Chestnut Hill, offered a prayer, and Miss Grace Caldwell of the North Bennet Street Industrial School gave a very interesting talk on her work.

During 1926, 179 inquiries were received concerning the school and its activities. The Little Wanderers' Home asked for an affiliation, and 2 girls were sent there for the summer, but no permanent connection has been made. In September, an affiliation was made with the South End Day Nursery, and 2 girls were sent there for six months' training. Also, in October, 1 girl was sent to the Hecht Neighborhood House to assist in the afternoon care of the children.

The Nurserymaids have formed an Alumnæ Association and have adopted a school pin.

There are 15 girls enrolled for the February class, and 4 more are waiting to be accepted. We have done very little advertising this year; therefore it is gratifying to feel that the school is becoming firmly enough established to "carry on" by itself. The reports from the employers of our graduates continue to be most encouraging, and we hope that in another year we may be able to train still larger classes.

Respectfully submitted,

ANNE B. ELIOT.

### *REPORT OF THE CUTTING COMMITTEE*

---

The Cutting Committee of the Ladies' Aid of the Infants' Hospital has met nine Tuesday mornings during January, February and March, 1926, with an average attendance of eight. We would have welcomed a larger number of workers, but are very grateful to those who did help us and attended so faithfully. Thanks are also due the Societies which have done so much of our sewing. These are the Dorcas Society of Emmanuel Church, the Industrial Society of St. Paul's Cathedral, the Needle Woman's Friend Society, and the Co-operative Workrooms. The last three of these have also cut some

of our larger garments, such as doctors', nurses' and visitors' gowns.

The Committee has provided for use during the coming year the following.

Sheets .....	17 doz. and 7	Food laboratory aprons.....	2 doz. and 11
Spreads .....	10 “	Towels .....	26 “
Flannelette slips .....	16 “	Precaution bags .....	3 “
Cotton slips .....	6 “	Blankets .....	16 “
Flannelette jackets .....	10 “	Shirts .....	17 “
Premature Jackets .....	3 “	Bands .....	13 “
Doctors' gowns .....	2 “	Stockings .....	9 “
Nurses' gowns .....	10 “	Bibs .....	8 “
Visitors' gowns .....	4 “ “ 2	Pads .....	518
Bassinette linings .....	5 “	Diapers .....	2000

Respectfully submitted,

(Signed) HELEN M. RICHARDSON,  
*Director for the Cutting Committee.*

## MISCELLANEOUS GIFTS TO THE HOSPITAL, 1926

Benevolent Committee of the First Parish Church, Dorchester—Nightgowns and gertrudes.

Boston Branch Needlework Guild of America—124 bands, 3 pr. slippers, 16 blankets, 10 rompers, 1 afghan, 48 diapers, 4 dresses, 6 pr. mittens, 26 hoods, 33 nightgowns, 6 petticoats, 2 pillow cases, 13 sacks, 3 large sheets, 20 crib sheets, 26 pr. socks, 23 sweaters, 32 towels, 30 undervests, 2 union suits, 12 wash cloths, 2 wrappers.

Mrs. Richard Harle—Baby clothes.

Mrs. Edward B. Haven—Sweaters.

Mrs. John Heard—Nightgowns and aprons.

FORM OF BEQUEST

---

*To the Corporation:*

I give and bequeath to the INFANTS'  
HOSPITAL, a corporation established under the  
laws of the Commonwealth of Massachusetts,  
the sum of . . . . .

# INFANTS' HOSPITAL

## Forty-Fifth Annual Report

January 1, 1927 to December 31, 1927

# INFANTS' HOSPITAL

300 LONGWOOD AVENUE, BOSTON

---

INCORPORATED JANUARY 19, 1881

## Forty-Fifth Annual Report

January 1, 1927 to December 31, 1927

**T**HE INFANTS' HOSPITAL extends to infants not over two years of age medical treatment without regard to sex, race, creed, color, or residence.

Emergency cases will be admitted at any time if a vacancy exists. Questions in regard to such cases and other matters of information may be referred by telephone to the Hospital at any time. Telephone Aspinwall 5930.

An affiliated course of instruction for nurses is given at the Hospital by the Hospital Staff.

The Hospital, in affiliation with other organizations, provides instruction for nursery maids. Applications for graduate nursery maids will be received by Household Nursing Association, 222 Newbury Street, Boston; telephone Back Bay 7350.

Relatives are admitted to the wards on Saturdays from 2 to 4 o'clock P. M.

*REPORT OF THE MEDICAL DIRECTOR*  
*FOR THE YEAR 1927*

---

The Corporation and its generous supporters may look with pride on their trust, the INFANT'S HOSPITAL, as it compares favorably with the best of similar institutions in point of physical equipment, by providing approved methods for diagnosis and facilities for carrying on the best of the old as well as the modern forms of treatment. The nursing personnel of the Hospital affords almost individual care to the little patients and highly specialized care is provided for those requiring such attention.

Inasmuch as the actual care of the sick is entrusted to the Medical Staff, it seems appropriate at this time to mention a few of the ways in which the members of the Staff are endeavoring to meet this responsibility. In addition to the House Officers, a well trained pediatrician is in resident attendance, and directly supervises the treatment of the patients according to the recommendations of the attending staff. Each day, visits are made by an attending pediatrician so that a "consulting service" is offered each infant whose condition is not progressing satisfactorily.

The Medical Staff meets each week and critically surveys the history of each patient who has been discharged. The record is carefully analyzed in order to determine the correctness of the diagnosis, the form and the results of treatment. Attention is also given to the need for further care and the way in which this can best be brought about.

Every month the records of the patients who have died are reviewed. Here the nature of the illness is freely discussed, and the question as to whether the disease could have been prevented in any way, or whether it was a disease for which there is a well established form of preventative or curative treatment, is carefully considered. These discussions keep before us the importance of the preventative aspects of disease and stimulate us to seek further knowledge of disease and to inquire into the newer methods of diagnosis and treatment. By these and other means we endeavor to keep abreast of the rapid advances in medicine and to improve our skill and judgment in the interest of the sick infants.

It will be of interest to the Ladies' Aid Society to know that the day on which their new Oxygen Tent was delivered, a baby of three months, suffering pneumonia was admitted. It was most gratifying to observe the immediate relief which followed when the baby was placed in the tent.

There have been no essential changes in the manner of instruction to nurses, medical students or graduate physicians. The special activities of this year, and the attendance report is fully presented in the report of the Superintendent. Full credit should be given to the personnel of the Hospital Staff for their unfailing interest and their untiring efforts in the medical care of the patients.

Mention should be made of the increased laboratory facilities which will, it is hoped, follow as the result of the addition of an entire story to the original one story building of the research laboratory. A large and beautiful Laboratory Study has been included in this building. The Study, given in memory of a little girl, was made possible through the generous gift of her parents. The legend on a bronze tablet over the fireplace, fully explains the purpose of the study.

### LEGEND

THIS ROOM IS GIVEN FOR STUDY  
AND FOR REFLECTION WITH THE  
HOPE THEREBY TO FACILITATE  
DISCOVERIES HELPFUL TO THE  
HEALING OF CHILDREN.

Such a service benefits little children as much as does the actual care of the sick, even though the care is perfect according to our present light.

Respectfully submitted,

KENNETH D. BLACKFAN.

### *MISCELLANEOUS GIFTS TO THE HOSPITAL*

---

Benevolent Committee of the First Parish Church, Dorchester—38 cotton nightgowns.

Boston Branch Needlework Guild of America, Mrs. Guy Cunningham, 76 Walnut Place, Brookline—495 articles—wearing apparel and bedding.

Mrs. John Heard, 439 Marlboro Street, Boston—6 flannelette nightgowns.

### THE SOLARIUM

Top—The Exterior. Bottom—The Interior

This new sun room has been erected on the roof of the Infants' Hospital. Note the sloping end facing directly south. This has been fitted with a modern glass which permits the active rays of the sun to filter through. Here the little patients, without exposure to wind or weather, receive beneficial effects of the healing rays from the sun.

## REPORT OF THE SUPERINTENDENT

---

During the year 1927, 830 patients were admitted to the INFANTS' HOSPITAL, and a daily average number of 47 were treated. 521 were discharged relieved, 8 unrelieved, 39 to other hospitals, and 27 were discharged on parents own responsibility, or against advice.

Miss Henry, the supervisor in charge of the Hospital for the past three years, resigned in April on account of illness, and her assistant, Miss McKenzie was appointed to take her place. With the exception of the above changes, the Staff of the Hospital remains the same as last year and is as follows:

- 1 Graduate Day Supervisor
- 1 Graduate Assistant Day Supervisor
- 1 Graduate Night Supervisor
- 1 Graduate Assistant Night Supervisor
- 2 Graduate Head Nurses (one on each floor)
- 1 Graduate in charge of Food Laboratory
- 1 Graduate in charge of Treatment Room
- 21 Student Nurses
- 4 Nursery Maids
- 3 Attendants
- 2 Maids
- 2 Porters
- 1 Recorder
- 1 Social Service Worker
- 1 Social Service Stenographer

An order was placed in the early part of the year for screens for all porches, and these were put in place as soon as they were required. The cost was taken care of by the Ladies' Aid Committee, and although the expense seemed very great, the screens have been well worth the cost in the satisfaction they have given in allowing us to move the babies out onto the porches. The Ladies' Aid Committee has unfailingly supported the Hospital in all its requests during the year, and has provided much new equipment which has assisted greatly in the progress we have made. A special box for transporting premature infants to the Hospital was requested by the doctors, and this has proved of great assistance in reducing mortality in this type of case. When a request is made to admit a premature case, this special conveyor is sent to the home with the doctor, and it eliminates all danger of exposure to the patient. The studies and the treatment carried on in the Premature Room have been of the utmost satisfaction to the doctors, and statistics show that the mortality is the lowest it has ever been in the history of the Hospital. This would seem to amply justify the expense involved in providing this room.

Each year shows great advancement in the type of service which the Laboratory Building can offer. During the past year an extensive investigation of pneumonia cases was undertaken, as this disease is attended

with a very high mortality in infancy, and the doctors feel that they cannot satisfactorily cope with it. A new Solarium has been erected on the roof of the Hospital and is now ready for use. The glass for this solarium was provided by the Acitol Products Company of New Jersey, and the above company is willing to meet the expense involved in order that they may have the benefit of the doctors' experience with this type of glass. This solarium represents a distinct improvement in our method of treating rhachitic children, and will eventually be available for the treatment of children suffering from tuberculosis, which will be very desirable. There seems to be no place where we can send young infants who need prolonged care, and although four or five beds will not solve the problem, it will be a step in that direction.

The receipts from the board of patients show a very substantial increase over last year, and it is felt that this is due in some measure to the newly created position of Credit Adjuster which has been established for both Hospitals. A carefully worked out plan has been put into effect whereby the parents of all children admitted are interviewed as to their circumstances, so that a fair rate can be established. Parents of children discharged without payment of the bill in full are again interviewed to see if installment payments cannot be pledged for later dates.

It has always been the custom of the Ladies' Aid Committee to purchase and make all the linen and clothing used in the Hospital. This past year the Committee decided to meet the expense, but to let the Hospital purchase the material, and have it made up by the Needlewoman's Friend Society of Boston. This arrangement seems to be working out very satisfactorily. The Hospital is very grateful to the Needleworkers' Guild of America who donated 495 articles of clothing, and also to the Directory for Wet Nurses who supplied without charge, 3672 ounces of Breast Milk over and above the regular amounts which we purchase from them each month.

A new utensil sterilizer was purchased for the Food Laboratory, and a special control valve was installed to regulate the supply of brine. Lockers were also provided in the basement for the students, as it was felt in this way they could be encouraged to bring their own equipment.

The administration wishes to express deep appreciation to the Officers and Directors, the Ladies' Aid Committee, and the Staff, for their constant encouragement and assistance.

The Medical Statistics for the year ending December 31, 1927, are as follows:

Number of patients remaining in the Hospital Dec. 31, 1926	48	
Number of patients admitted during the year 1927 . . . . .	830	
Number of patients discharged during the year 1927 . . . . .		849
Number of patients remaining in the Hospital Dec. 31, 1927		29
	<hr/>	<hr/>
	878	878

Number of patients—Pay (\$10.00) .....	266
Number of patients—Part Pay .....	539

## ANNUAL REPORT OF THE SECRETARY OF THE LADIES' AID COMMITTEE

The year just closing has been one of activity for the Ladies' Aid Committee, and by this activity we have been able to render considerable financial aid to the Hospital.

Regular meetings were held from October to May. The date of the annual meeting was changed from May to January in order to coincide with the financial year.

There have been two changes in the officers of the Committee.

Mrs. Edward L. Bigelow resigned as President after three years of most efficient service and Mrs. George Putnam resigned as Secretary after five years. Both resignations were accepted with great regret as well as with deep appreciation of the services rendered.

Mrs. Samuel D. Warren was elected President and Mrs. William E. Ladd Secretary.

In April, on account of ill health, Miss Henry resigned her position as Head Supervisor after a very successful service. Miss McKenzie who had been Miss Henry's assistant is taking her place most satisfactorily.

The Teas for the nurses have been resumed this year and are proving very successful. The two already given have had an attendance of between one hundred and one hundred and sixty nurses.

The activities of the year have brought in the following amounts:	
The proceeds of the three weeks' exhibition of Titania's Palace	\$9,136.82
Refund of advance payment on Titania's Palace.....	500.00
Additional cheque from the Cabaret of 1926.....	15.00
Proceeds from the sale of Snow Bloomers .....	84.35
Cheque from Boston Cat Club, receipts from annual Cat Show	350.19
Dues and Gifts .....	42.00
Interest .....	70.30

The Committee has paid:	
Permanent endowment of the Ladies' Aid Bed.....	\$6,000.00
Labor and supplies .....	1,464.00
Salary and expenses of Social Service Worker.....	2,036.27
Insurance and premium on exchange of Ford Car.....	359.46
Screens for the Hospital .....	1,250.00
For Dr. Wyman's fund .....	500.00
Miss Story's vacation and salary of substitute.....	158.38
Coal and cash for Agnes Mahoney, aged chorewoman.....	130.11
Printing and Postage .....	90.25
Six cribs and two tables for the Hospital .....	287.25

Bloomer material .....	118.69
Typewriter and filing cabinet .....	143.25
Premature bag .....	95.00
Expenses for Mr. Sherer's Day given in recognition of his great kindness during the exhibition of Titania's Palace	100.00
Sterilizer and cost of installing same .....	222.72
One half cost of moving picture camera for Dr. Wyman....	147.00
Equipment for Nurses' Teas .....	25.00
Moving picture reel of Hospital activities for advertising....	50.00
	<hr/>
	\$11,177.22

Leaving us with a balance on January, 1928, of \$1,138.82.

Respectfully submitted,

KATHERINE LADD,  
*Secretary*

## REPORT OF NURSERY MAIDS' COMMITTEE

There are twenty-six girls in the school at present.

5 at the Infant's Hospital.

1 at the Hecht Neighborhood Nursery.

3 at the South End Day Nursery.

5 at the Children's Community School, New Haven

12 at the Convalescent Home, Wellesley.

Thirty-one girls entered the school in 1927, and of these, five were unable to finish.

During the summer a questionnaire was sent out to the nursery maids and their employers. This was done to find out whether the results of the nursery maid training justified the expenditure and effort involved.

Fifty-two letters were sent to employers, and twenty-three answered; forty-two letters were sent to nursery maids, and twenty-seven answered.

By far the greater number of employers felt the girls did better for being trained. Most of the girls had their wages raised after six months to \$18. Some of the girls from the first class are receiving \$20 a week.

The larger number of employers thought the girls were better with babies than with older children. Most of the girls preferred to care for babies, and some said they did not know how to manage older children. This seems to point to a need for more instruction in the handling of older children. It has been suggested that the nursery school training, which is very expensive, should be discontinued, and that Wellesley should have a playground instructor for the children, and that she should give part of her time to the teaching of the nursery maids.

Only \$25 has been spent for paid advertising during the year, and this was donated by a friend. Sixteen girls were graduated in May, 1927.

Up to December 1st, the INFANT'S HOSPITAL share of the training was \$1,176.36, and forty-one girls have spent two months at the Hospital.

Twenty girls are already enrolled for the class, January 10, 1928.

Respectfully submitted,

MARY S. C. CURTIS

## REPORT OF THE SOCIAL SERVICE COMMITTEE

### COMMITTEE FOR 1928

MRS. JOHN HOMANS, JR., *Chairman*

MRS. OLIVER AMES, JR.

MRS. HOMER B. RICHARDSON

MRS. R. G. WADSWORTH

MRS. WALLACE GOODRICH

MRS. THOMAS S. BLUMER

MRS. STEPHEN W. SLEEPER

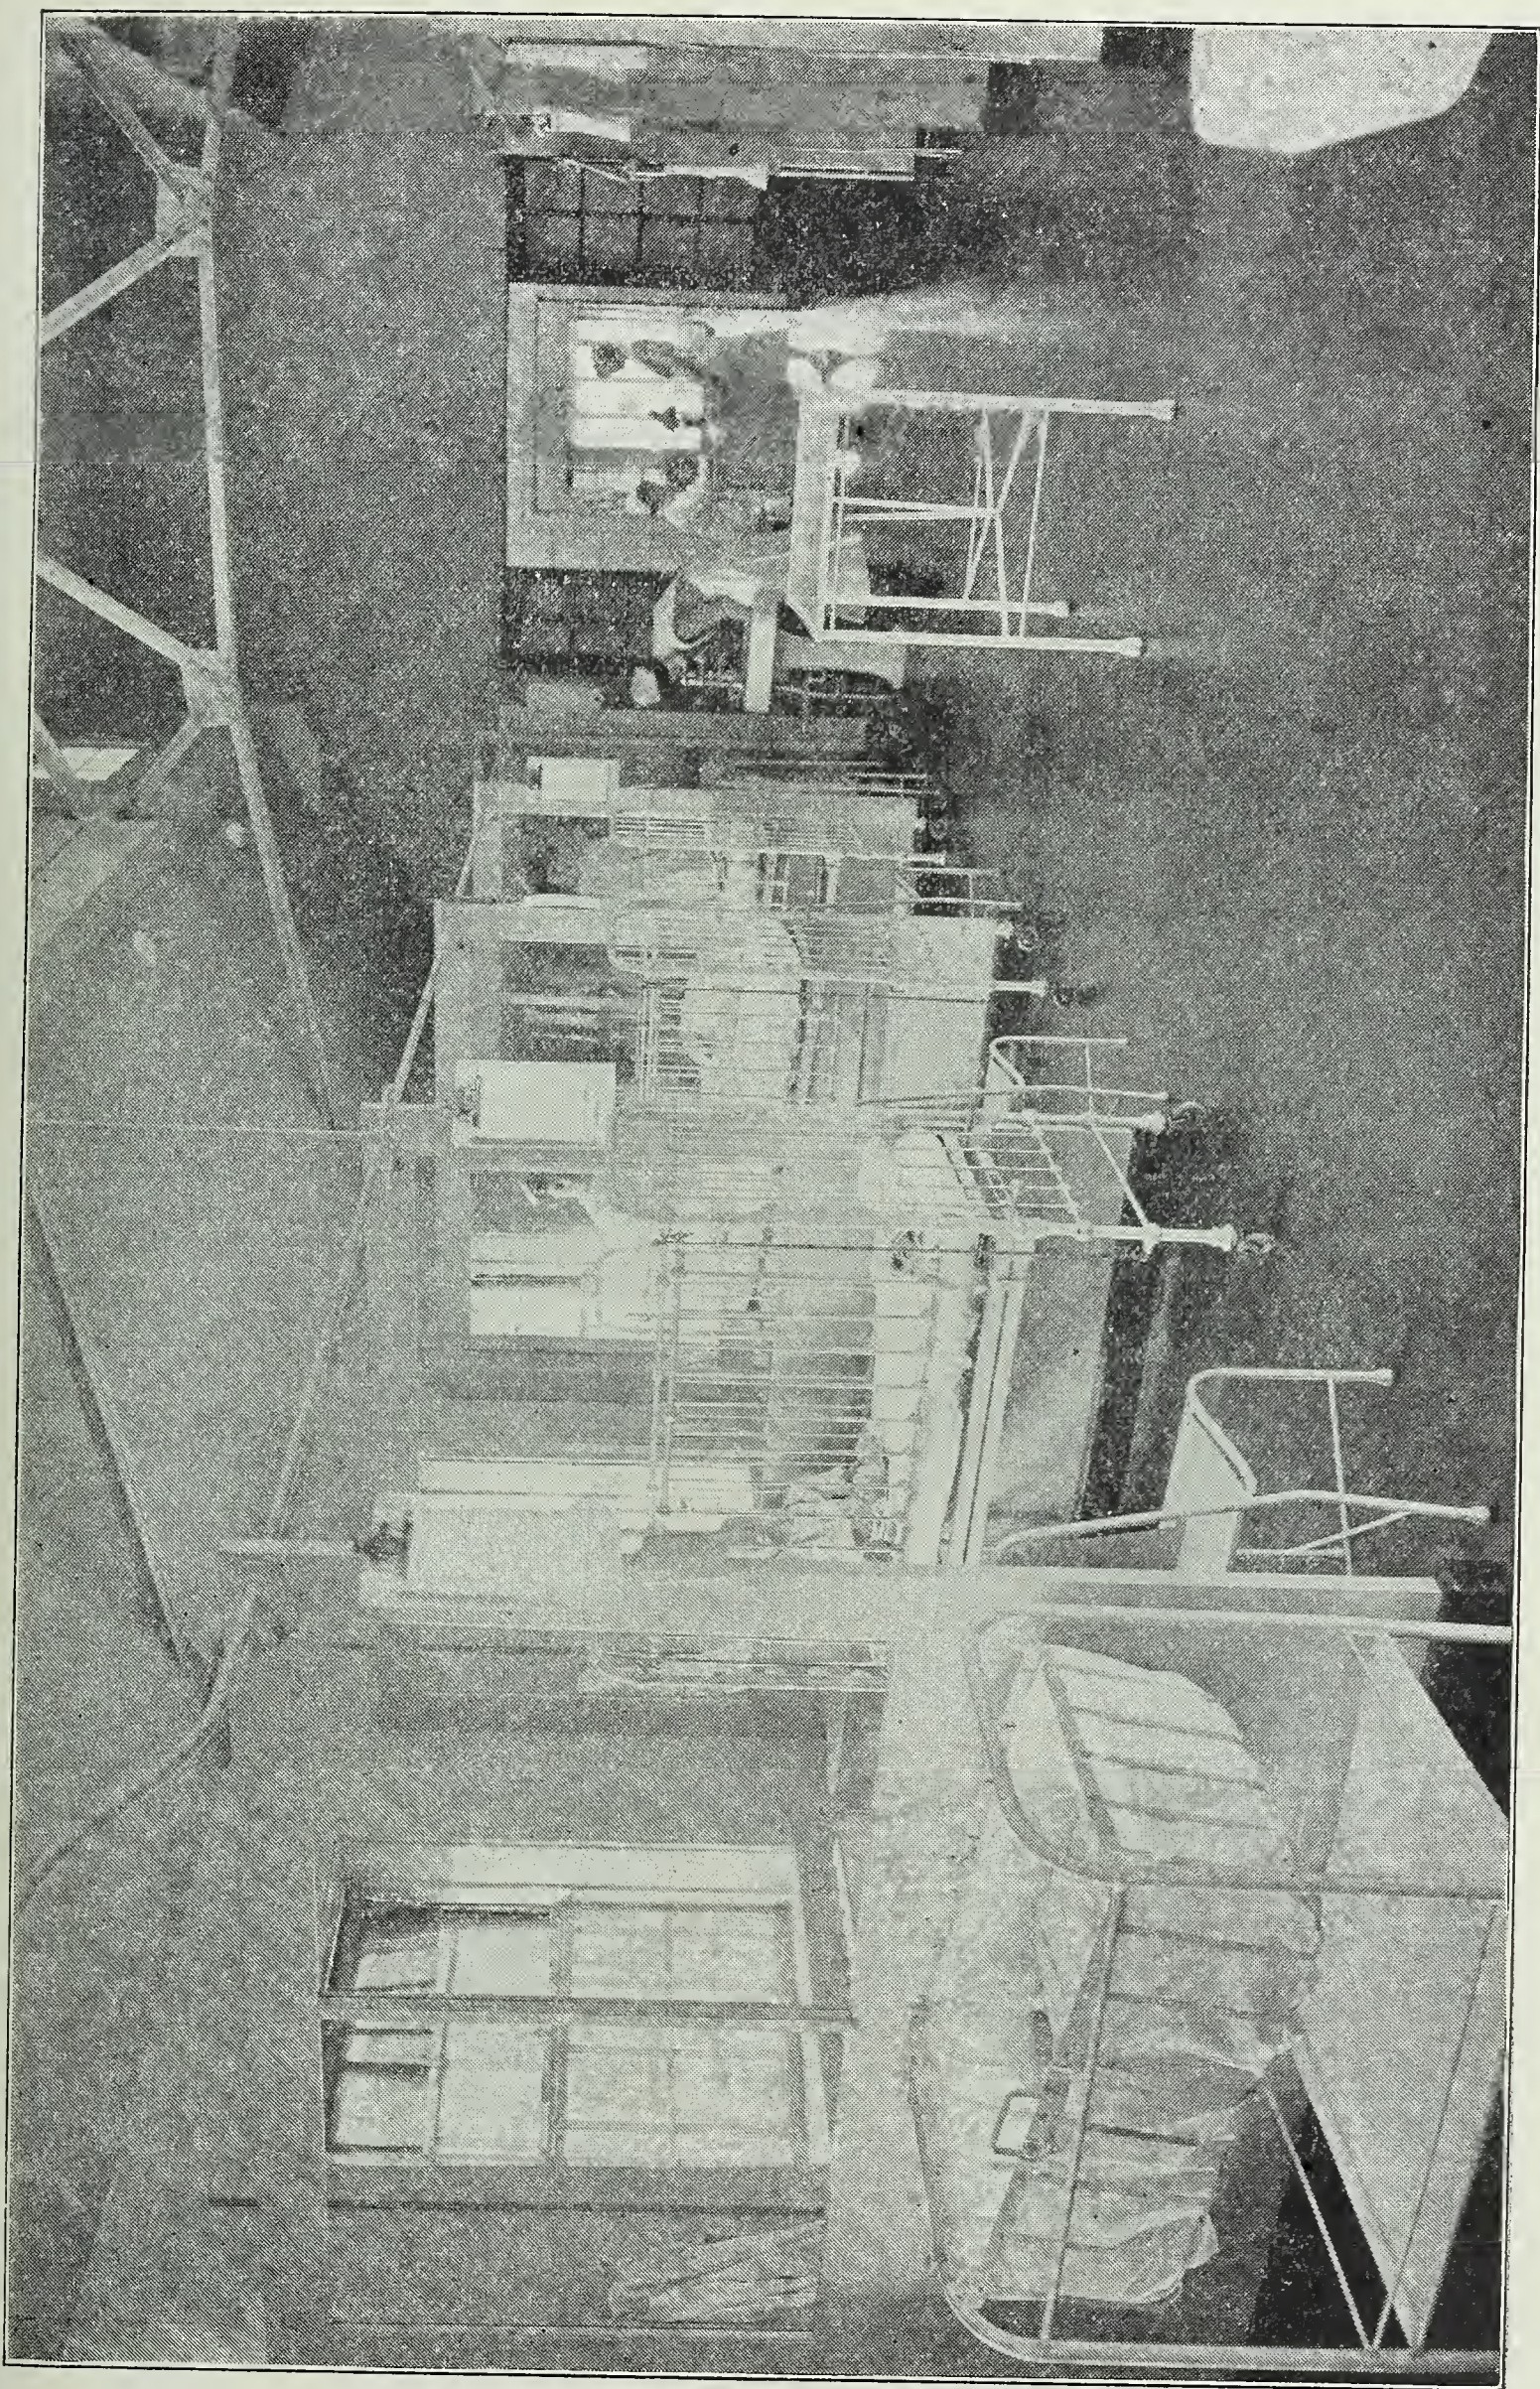

The Social Service Committee has held regular monthly meetings during the winter season. During the year, Miss Marion B. Story, the head worker, has opened 165 cases and made 962 visits. Over 50 percent of the cases admitted in 1927 were out of the strictly Greater Boston limits, extending from Old Town, Maine, to Nantucket. Miss Story has given as much attention as was possible to all cases at a distance, but, has had to confine her intensive and instructive work to those cases near and within Boston.

Respectfully submitted,

ALICE HOMANS,

*Chairman*

*LADIES' AID COMMITTEE*

## FORM OF BEQUEST

---

*To the Corporation:*

I give and bequeath to the INFANTS'  
HOSPITAL, a corporation established under the  
laws of the Commonwealth of Massachusetts,  
the sum of . . . . .

# INFANTS' HOSPITAL

## Forty-Sixth Annual Report

January 1, 1928 to December 31, 1928

# INFANTS' HOSPITAL

300 LONGWOOD AVENUE, BOSTON

---

INCORPORATED JANUARY 19, 1881

## Forty-Sixth Annual Report

January 1, 1928 to December 31, 1928

THE INFANTS' HOSPITAL extends to infants not over two years of age medical treatment without regard to race, creed, color or residence.

Emergency cases will be admitted at any time if a vacancy exists. Questions in regard to such cases and other matters of information may be referred by telephone to the Hospital. *Telephone ASPinwall 5930.*

Relatives are admitted on Saturdays from 2 to 4 o'clock P.M.

---

*For 40 years the Infant's Hospital has treated and cared for very sick babies.*

*Annual subscriptions and funds for endowment are earnestly solicited.*

*More than half the running expenses must be raised from old and new friends annually.*

---

\$4.00 gives 1 baby light, heat, food, nurses and doctors for 1 day  
\$28.00 gives 1 baby light, heat, food, nurses and doctors for 7 days  
\$80.00 gives 1 baby light, heat, food, nurses and doctors for 20 days  
\$120.00 gives 1 baby light, heat, food, nurses and doctors for 1 month  
\$200.00 runs the whole hospital full of sick babies for one day  
\$6,000.00 endows a memorial bed in perpetuity

*REPORT OF THE MEDICAL DIRECTOR**FOR THE YEAR 1928*

---

This year, there has been a notable lessening in frequency of certain diseases which have been regarded as the chief contributors to the high death rate in babies before the second year. "Summer Diarrhoea" to which babies are particularly susceptible and which in former years has been the largest single cause of death during the summer months, was, despite the extreme variations of temperature and humidity, remarkable by its low incidence. Rickets, another devastating condition, which is now recognized as a preventable disease, likewise has shown a gratifying decrease. The decrease in the number of these diseases can be directly traced to the acquisition of knowledge regarding their prevention, and the widespread dissemination through the infant welfare stations to the mothers in the community, of information as to the means of keeping their well babies well.

On the other hand, there has been a marked increase in the number of premature babies brought to the Mary Elizabeth Premature Ward. Not only have the facilities, which have been developed for the care of such patients, become generally known in this community, but the demonstration regarding the usefulness of the "air conditioning system" has brought requests for information concerning it, from widely distributed points throughout the country. The apparatus, first developed specially for the INFANTS' HOSPITAL, is now regarded as a necessity in all modern hospitals. It should be pointed out, however, that the maintenance of a steady body temperature will not, by itself, spare life. As the result of the intensive study which has been in progress since its installation, it is now possible to recognize "danger signal" symptoms which enable us to institute safety measures, at an early period. The Staff are deeply indebted to Miss McKenzie and her staff of able nurses for their intelligent, watchful attention, and to the Resident Staff for their skill in administering transfusions, so necessary in saving the lives of these patients.

Through the generosity of the Ladies' Aid Society plans are now in progress to install the "air conditioning apparatus" in another room, where we hope to study the effect of stabilized thermal conditions on other types of sickness.

The studies, which have been conducted by Dr. Wyman in the new sun-room, already show that "Celo Glass" transmits the curative rays of the sun during the late winter months as effectively as do the more expensive commercial glasses.

A number of important investigations have been carried out by the research members of the staff: a new and rapid blood method for the diagnosis of tuberculosis has been elaborated; a more effective method of treating convulsions in lead poisoning has been found;—studies relating to pneumonia and other diseases in which there are fundamental disturbances in the metabolism of water and salts in the body have contributed information of value.

In addition, the teaching of undergraduate and graduate medical students, and nurses, has been going on, as in the past. To express the activities of the Hospital in figures, 873 patients were cared for with an average stay of nineteen days per patient. Last year there were 830 patients admitted with an average stay of twenty days per patient. Shortening the length of stay in the Hospital benefits the Hospital by increasing the number of patients cared for, without increasing the basic overhead charges. This can be done only through the cooperative effort of the medical, nursing and social service members of the staff. To them credit should be given for the accomplishment during 1928.

The Active Staff wishes to acknowledge their appreciation of the interest and helpfulness of the Directors of the Hospital, the Ladies' Aid Society, and the Superintendent.

Respectfully submitted,

KENNETH D. BLACKFAN.

### *MISCELLANEOUS GIFTS TO THE HOSPITAL*

---

Boston Branch Needlework Guild of America, Mrs. Guy Cunningham, 76 Walnut Place, Brookline—752 articles—wearing apparel and bedding.

Mrs. Hollinsworth—2 baby afghans.

Mrs. Charles W. Lovett, 25 Autumn St., Boston—2 bonnets and hoods.

Mrs. J. M. White, 1090 Beacon Street, Boston—baby sweaters and blanket.

Mrs. Charles A. Williams, 35 Walnut Place, Brookline—3 blankets, flannelette.

## REPORT OF THE SUPERINTENDENT

---

In presenting the report of the INFANTS' HOSPITAL for the year 1928, it is encouraging to observe that the figures show continued growth. The number of patients admitted was 873 as compared with 830 in 1927, although the daily average of 46+ was practically the same. Certain conditions made it necessary to restrict the number of patients admitted to a capacity of 50, which is the approximate number that the hospital has cared for throughout the year.

The Floating Hospital, having a large number of patients dependent on it for medical attention, and lacking the facilities for hospitalization arranged with the INFANTS' HOSPITAL during the past summer, to have patients admitted through the office of the Superintendent of the Floating Hospital. A co-operative arrangement was drawn up by the Directors which has worked out most satisfactorily, and fourteen babies were admitted for care.

A most gratifying addition to the valuable resources of the hospital was the new Solarium opened the first of the year. Babies have been treated in this room constantly and the research work conducted under Dr. Wyman has shown successful progress in the treatment of rickets. A special glass known as Celo-glass which permits the transmission of ultra violet rays was installed in the Solarium, and this was replaced during the summer months by screens which permitted the treatment of the patients with direct sun rays.

The Ladies' Aid Committee have assisted with unfailing interest and generosity in all demands presented to them covering new equipment, linen requirements, furnishing teas to the student nurses, and many other items provided by their committee as a whole, or individually. The oxygen tent for the treatment of pneumonia cases which they provided last year has been constantly in use and another tent has been requested by the doctors and will be put in use as soon as it is delivered. It is desired to extend the ventilating system installed in the Premature Room to the Research Ward on the floor above, where babies not premature, but failing to gain in a satisfactory manner may be treated. Through the generosity of Mrs. Crowninshield this request has been granted. Another piece of equipment which provides artificial respiration is being perfected by our Staff in co-operation with the Harvard School of Public Health.

There have been no essential changes in the working staff of the Hospital which remains the same as last year and is as follows:

- 1 Graduate Day Supervisor
- 1 Graduate Assistant Day Supervisor
- 1 Graduate Night Supervisor
- 1 Graduate Assistant Night Supervisor
- 2 Graduate Head Nurses (one on each floor)
- 1 Graduate in charge of Food Laboratory
- 1 Graduate in charge of Treatment Room
- 21 Student Nurses
- 4 Nursery Maids
- 3 Attendants
- 2 Maids
- 2 Porters
- 1 Recorder
- 1 Social Service Worker
- 1 Social Service Stenographer

Our affiliations with outside activities also continue with no changes. The Directory for Mother's Milk supplies our needs although it was found necessary to make a slight increase in the cost per ounce. The affiliation with the Household Nursing Association has been entirely satisfactory and it is regretted that conditions may make it necessary for the Association to discontinue this course temporarily. The training of nursery maids has always been sponsored by the INFANTS' HOSPITAL and they have filled an important place in serving the community after completing this course. The receipts of the Hospital show a very substantial increase compared with previous years.

We are most grateful to the Needleworker's Guild of America who donated 752 articles of clothing, and also to the Needlewomen's Friend Society who took care of the cutting and sewing of all clothing and linen required during the past year.

In concluding, appreciation is expressed to the Staff, Nurses and Employees who have assisted faithfully and efficiently and to whom the Hospital is indebted. To the Officers and Directors of the Hospital, I desire to express my sincere thanks for their constant aid and encouragement.

The Medical Statistics for the year ending December 31, 1928, are as follows:

Number of patients remaining in the Hospital, Dec. 31, 1927	29	
Number of patients admitted during the year 1928.....	873

## ANNUAL REPORT OF THE SECRETARY OF THE LADIES' AID COMMITTEE

This past year the Ladies' Aid Committee held regular monthly meetings as usual except during the summer months.

The activities of the Committee have been much the same as in the past, but this year we have had the great satisfaction of seeing most gratifying results from some of our larger efforts, such as the great improvement in the results with premature babies treated in the room where the new ventilating system was installed and also the cures effected in the new Solarium on the roof which was opened in January, 1928 and which has been most successful in the care of babies with rickets and with some forms of tuberculosis.

A pneumonia tent requested by Dr. Blackfan was purchased by the Committee and this has proved a most valuable addition to the Hospital equipment.

The Cabaret was held in January and from this \$1800.00 was realized which was sent to Mr. Stockton to provide the necessary funds for three beds during the coming year.

In August an entertainment was given at Stillington Hall in Gloucester and due to the generosity of Mr. Leslie Buswell the surtax on all tickets sold was given to the Ladies' Aid Committee.

At the meeting in February it was voted that the Secretary send a letter to each member of the Ladies Aid telling the needs of the Hospital and asking suggestions for raising in groups or individually \$600.00, the cost of maintaining a bed for one year. From these letters \$6,000.00 was sent to Mr. Stockton, which seems to demonstrate the very real interest which members of the Committee have in the Hospital.

Respectfully submitted,

KATHERINE E. LADD,  
*Secretary.*

## REPORT OF THE NURSERY MAIDS' COMMITTEE

During 1928, 33 girls entered the school. Of this number 9 were unable to finish. 105 inquiries were received. 22 girls graduated in May.

In March, the Directors of the Convalescent Home notified us of their decision to withdraw from the affiliation. This left us with only the Children's Community Centre in New Haven to give the longer part of the training—care of older children etc.—and to absorb all the girls not here at the INFANTS' HOSPITAL or at the South End Day Nursery. Many tentative plans were made, as we wished to continue the training, as did the other institutions remaining in the affiliation, but it seemed impossible to make arrangements which were satisfactory to all concerned, therefore at the last meeting the Committee reluctantly came to the conclusion that no more classes could be taken in now. There are 9 girls left in the school, who finish their training May 10th. We will then have rounded out 6 years of giving this training, and we are hopeful that in the near future, some solution may be found to our problem, and that the training may be taken up again.

Respectfully submitted,

ANNE B. ELIOT,  
*Chairman.*

JANUARY 1929.

## REPORT OF THE SOCIAL SERVICE COMMITTEE

## COMMITTEE FOR 1929

MRS. JOHN HOMANS, JR., *Chairman*  
MRS. WALLACE GOODWICH  
MRS. STEPHEN W. SLEEPER

During the past year the social worker has opened 174 cases—making from two to six visits, depending upon the need of more careful follow-up work, or upon the length of time before the mother can take her baby to a Well Baby Clinic. The worker has made 1075 visits. These visits include the survey visits upon the babies recently admitted

to the hospital, made for the purpose of learning something of the environment from which the babies come—visits made upon the babies directly after their discharge from the Hospital—and visits made to the various agencies who may be actively—or who are asked to become—interested in certain cases where their aid is needed.

Upon request, the State Department of Health has given a list of Public Health Nurses in all cities and towns in the state, and with these means the worker has been able to refer the out-of-Boston babies directly to the local nurse, who has most cordially co-operated in visiting and in sending a report upon the progress of the babies, at a later date.

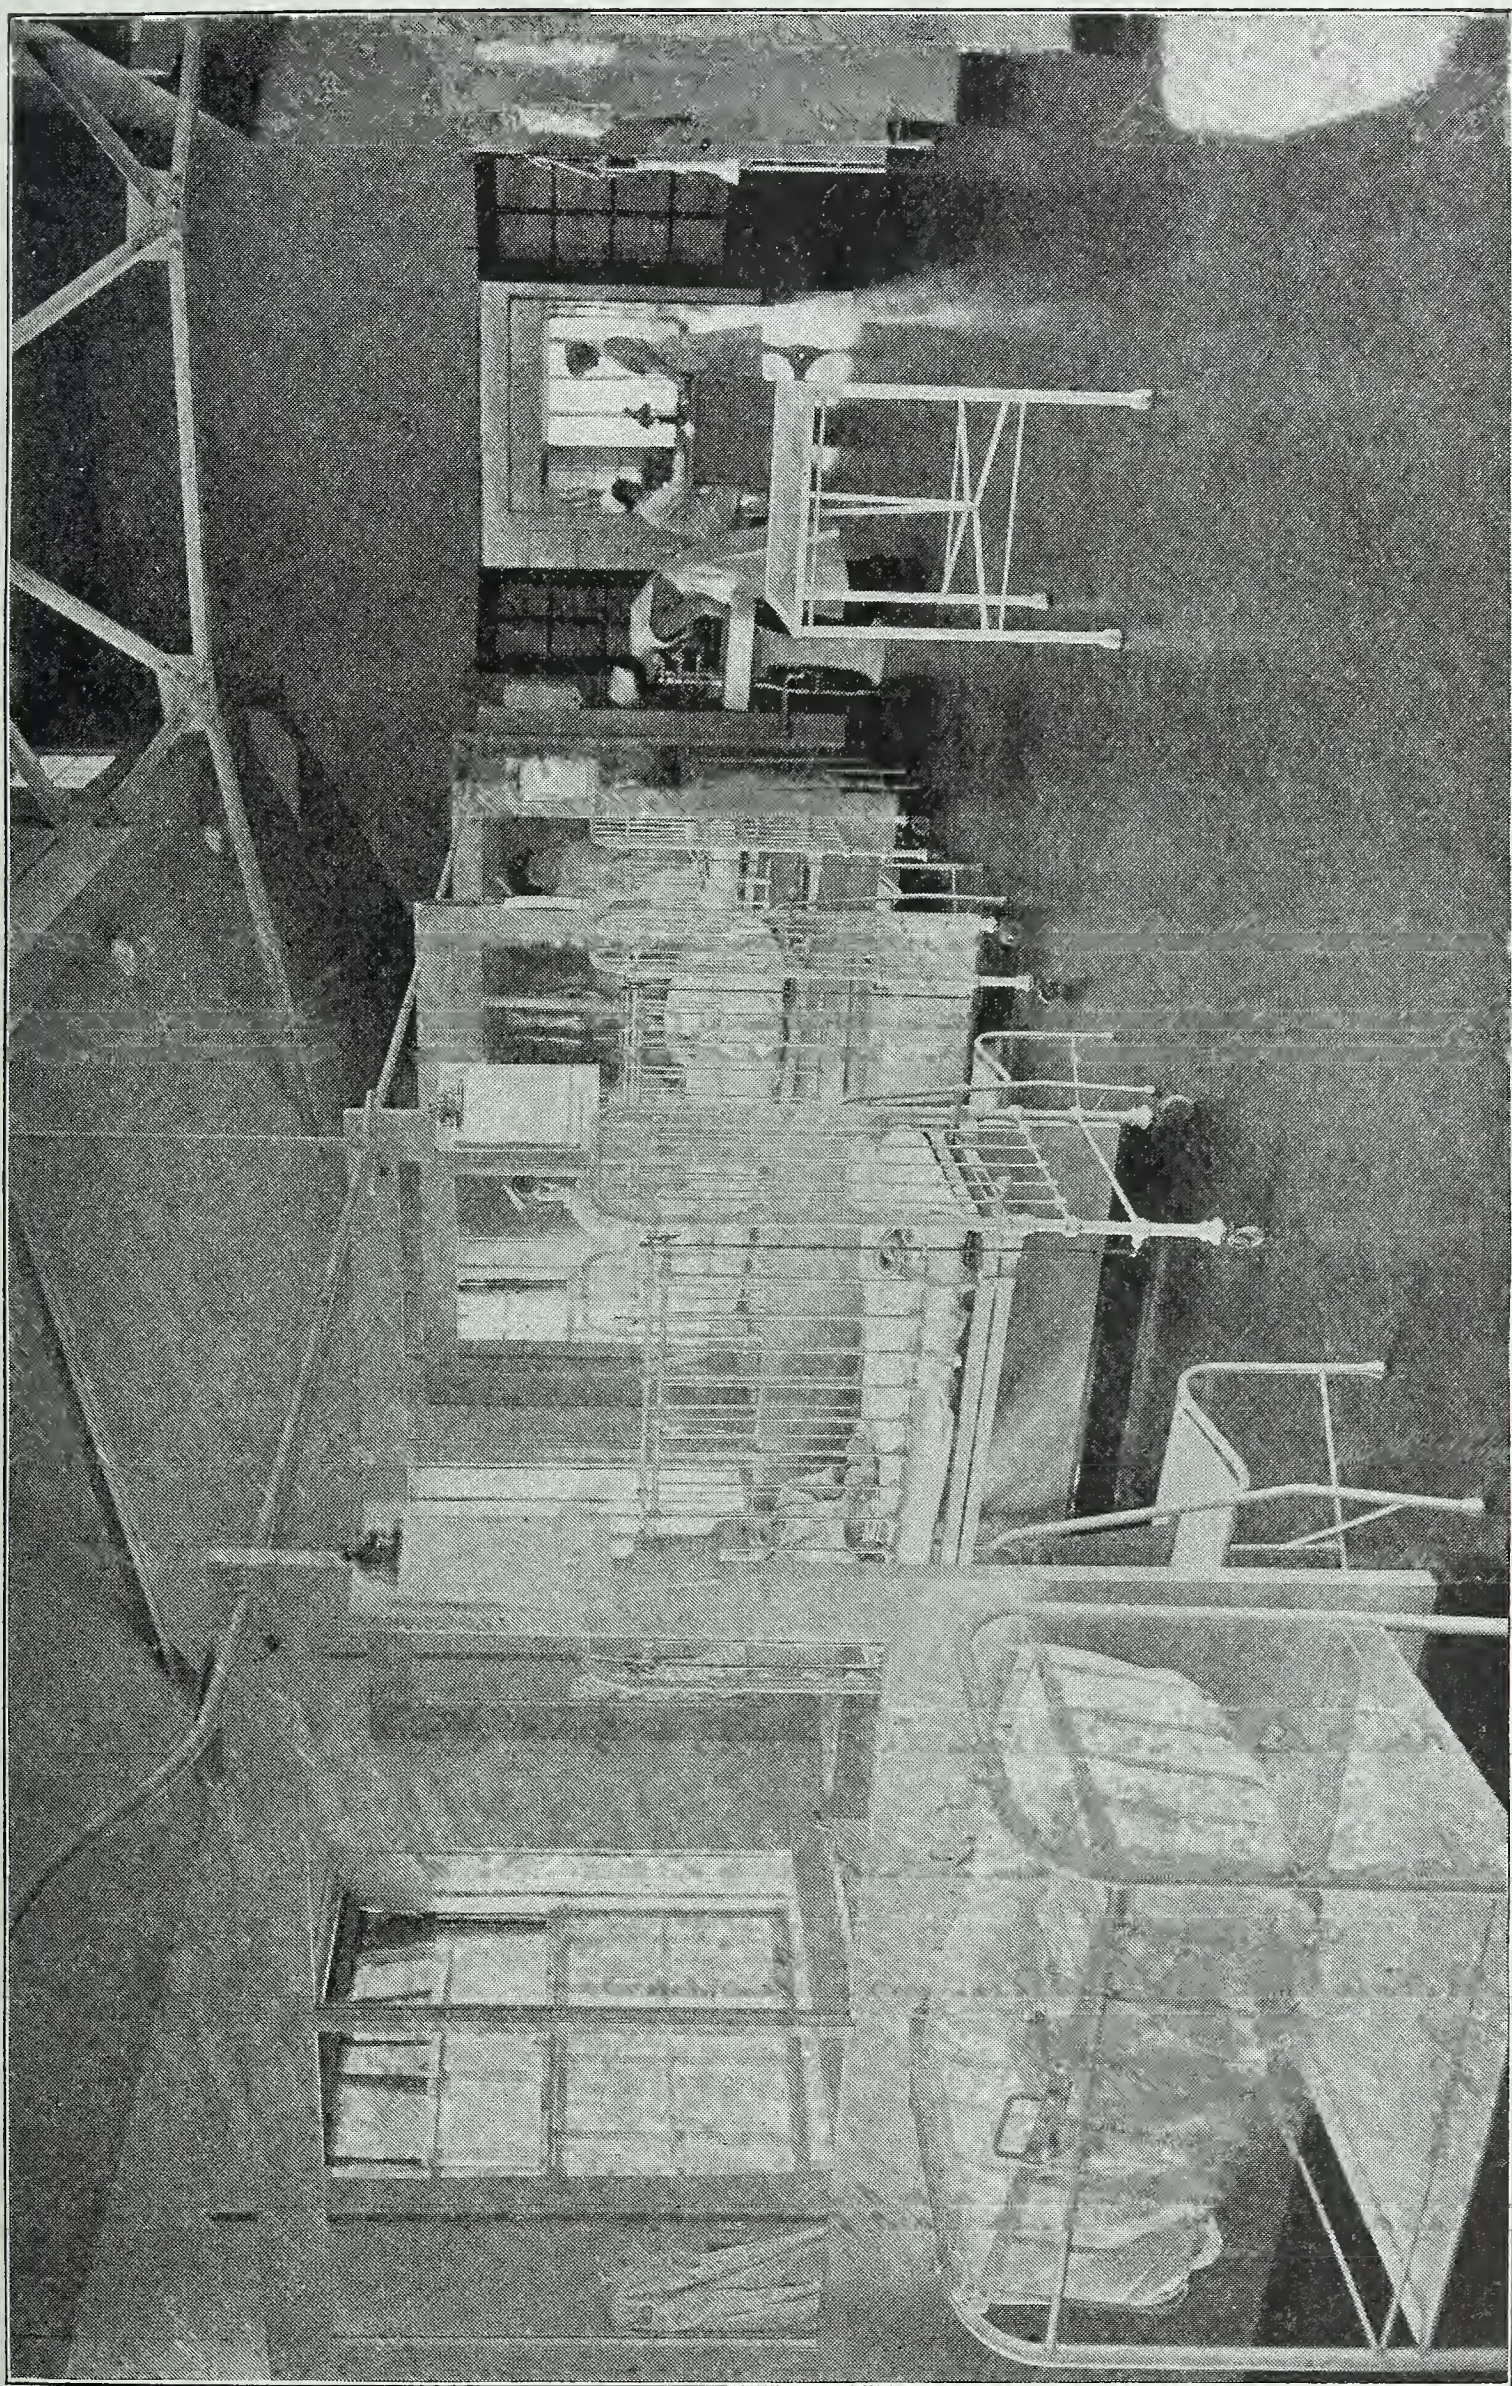

The worker has been aiding Dr. Wyman in his study of rickets—scurvy—and tetany, by endeavoring to procure a group of ten children in each type, to return to the Out Patient Department for an examination to determine the effect of the disease upon them since they were in the Hospital as babies.

In June the trustees of the Boston Floating Hospital decided to use some of their funds in paying board for worthy cases cared for in the CHILDREN'S and INFANTS' HOSPITALS. The Boston Floating Hospital social worker has made an immediate survey visit after the admission of each baby and has sent the report to the social worker in each hospital. After the discharge of the baby a summary of the findings and the treatment has been sent to the Boston Floating Hospital. Up to the present time it has sent 14 babies to the INFANTS' HOSPITAL.

Members of the Social Service Committee have had a Conference with the social worker before each monthly meeting.

ALICE HOMANS,  
*Chairman Social Service Committee.*

FORM OF BEQUEST

---

*To the Corporation:*

I give and bequeath to the INFANTS'  
HOSPITAL, a corporation established under the  
laws of the Commonwealth of Massachusetts,  
the sum of . . . . .

# INFANTS' HOSPITAL

## Forty-Seventh Annual Report

January 1, 1929 to December 31, 1929

# INFANTS' HOSPITAL

300 LONGWOOD AVENUE, BOSTON

---

INCORPORATED JANUARY 19, 1881

## Forty-Seventh Annual Report

January 1, 1929 to December 31, 1929

THE INFANTS' HOSPITAL extends to infants not over two years of age medical treatment without regard to race, creed, color or residence.

Emergency cases will be admitted at any time if a vacancy exists. Questions in regard to such cases and other matters of information may be referred by telephone to the Hospital. *Telephone ASPinwall 5930.*

Relatives are admitted on Saturdays from 2 to 4 o'clock P.M.

---

For 40 years the Infants' Hospital has treated and cared for very sick babies.

Annual subscriptions and funds for endowment are earnestly solicited.

More than half the running expenses must be raised from old and new friends annually.

---

\$4.00 gives 1 baby light, heat, food, nurses and doctors for 1 day  
\$28.00 gives 1 baby light, heat, food, nurses and doctors for 7 days  
\$80.00 gives 1 baby light, heat, food, nurses and doctors for 20 days  
\$120.00 gives 1 baby light, heat, food, nurses and doctors for 1 month  
\$200.00 runs the whole hospital full of sick babies for one day  
\$6,000.00 endows a memorial bed in perpetuity

*REPORT OF THE MEDICAL DIRECTOR  
FOR THE YEAR 1929*

---

Since the last report, there has been essentially no change in the manner in which the medical work has been conducted.

The service has been unusually active and even with the limitation of beds enforced by the necessity of not increasing the overhead expenses, eight hundred and sixty-seven patients were admitted. This number compares favorably with those cared for in former years. The policy has been followed never to turn from its door critically ill babies, and this has been strictly adhered to. Were it possible to secure resources to increase the total number of beds there is but little doubt that they would be filled. Nearly every day physicians who inquire about the admittance of patients have to be told that there are no available beds.

There was a noticeable diminution in the number of cases of infantile diarrhoea last summer, which was undoubtedly due to the improvement in socio-economic conditions and the public health program directed toward training of mothers in the prevention of disease. It is hoped that means will soon be found to reduce the high mortality of respiratory infections,—the chief cause of death in the winter months.

This past year completes three years of experience with the premature room. The results have been so gratifying that we are now in a position to give authoritative appraisal of its value in the care of premature babies. In the past three years, one hundred and ninety-seven babies have been treated with a total mortality of about twenty per cent. This is all the more remarkable when it is recalled that in the three years before the installation of the special air conditioning system the mortality was over sixty per cent. Formerly babies weighing two pounds or less, as a rule, did not survive. Recently we have received several infants under two pounds who have lived and when last seen were strong and vigorous. The conclusion can be drawn that there are three essential points in the care of premature infants. (1) Stabilization of body temperature. (2) Proper nutrition and nursing. (3) Prevention of infection. It is of interest that whereas respiratory infection develops, not infrequently, among infants on the open wards, the premature ward has been entirely free during the past three years.

Studies are now being made to develop means of treating atelectasis of the lungs, a frequent cause of cyanosis in premature babies. The use of the modified artificial respiration apparatus offers promise of success.

An analysis of the work which has been conducted in the Solarium for the past two years has shown conclusively that when babies are exposed to the available sunshine during the winter months, sufficient ultra-violet rays are transmitted through "celo-glass" to cure and prevent rickets.

It is too soon to make any statement relating to the effect of the establishment of the air conditioning system which was installed in the Research Room through the generosity of the Ladies' Aid Society. Last summer, infants with summer diarrhoea were placed there under varying conditions of temperature and humidity. These observations will be continued.

It is not unusual for mothers to make three or four trips daily to the hospital in order to nurse their sick babies. On the other hand many babies are deprived of breast milk owing to the fact that the mothers live so far from the hospital that it is not possible for them to come regularly. The situation could in part be remedied by the development of a suitable "rest room."

Recognition should be given to the Ladies' Aid Society for their interest and assistance, and to the members of the Medical and Nursing Staff and the Superintendent of the Hospital for their continued support.

Respectfully submitted,

KENNETH D. BLACKFAN.

January 30, 1930.

#### *MISCELLANEOUS GIFTS TO THE HOSPITAL*

---

Boston Branch Needlework Guild of America—1047 articles—wearing apparel and bedding.

Mrs. Charles W. Lovett, 25 Autumn St., Boston—6 baby bonnets.

Mrs. J. M. White, 1090 Beacon Street, Boston—baby sweaters.

Mr. and Mrs. A. H. Colby, 24 Vinton Street, Melrose—10 dozen turkish towels.

## REPORT OF AUDITOR

I have examined the Treasurer's accounts of the Infants' Hospital for the year ending December 31, 1929, and certify the cash on hand December 31, 1929, has been verified with the First National Bank; that an examination of the securities kept in the First National Bank Vaults have been made and found correct. The income called for by the investments has been accounted for, and payments are supported by checks returned through the bank, endorsed by the payee or by other vouchers.

VAL. T. HANSON,  
Auditor.

## REPORT OF THE SUPERINTENDENT

---

Numerous interesting developments together with several outstanding and progressive changes have taken place during the year 1929. The most prominent was the equipment of a "Respiration Room" in the basement with the necessary apparatus to administer artificial respiration and to study respiration particularly in infants. Extensive studies were made by Dr. Blackfan and his Staff who worked in co-operation with Harvard School of Public Health in the perfection of this apparatus. Most satisfactory results have been obtained in patients developing respiratory failure due to infantile paralysis. The extension of the central air conditioning system to the Research room was also completed early in the year and has contributed valuable assistance in the treatment of numerous types of cases. An additional pneumonia tent was provided and has been in constant use. A small size pneumonia tent has been made by the Hospital mechanic under the direction of the doctor in charge of this branch of research. While all details of workmanship are not quite as finished in appearance as the tents purchased, it works out ideally for our needs and costs only a fraction of the amount.

The appearance of the Hospital was greatly improved by painting the Wards, Research rooms, and corridors, throughout. During the two weeks required to complete the job it was necessary to curtail the daily number of patients but very fortunately there were relatively few requests for admission. New aluminum chart holders were purchased to replace the white enamel chart holders in use since 1923. A "call system" for locating doctors has also been installed throughout The Children's Hospital and Infants' Hospital, and saves a great deal of time for the nurses and doctors. Each doctor is given a number which rings in all departments of the Hospital, thereby enabling the telephone operator to locate the doctor with a minimum of effort.

The receipts for the care of patients show a substantial increase compared with previous years, which is very gratifying as economic conditions have been unfavorable and the story of lack of employment has been told repeatedly by parents bringing babies for admission.

Miss McKenzie, supervisor in charge of the Infants' Hospital for the past three years resigned in May to be married to Dr. E. T. Wyman, and Miss Fletcher a graduate of The Children's Hospital was appointed in her place. The nursery maid course conducted in affiliation with the Household Nursing Association was discontinued and for this reason it was necessary to supplement the working staff with two attendants. Outside of the above changes the staff remains the same and is as follows:

- 1 Graduate Day Supervisor
- 1 Graduate Assistant Day Supervisor
- 1 Graduate Night Supervisor
- 1 Graduate Assistant Night Supervisor
- 2 Graduate Head Nurses (one on each floor)
- 1 Graduate in charge of Food Laboratory
- 1 Graduate in charge of Treatment Room
- 21 Student Nurses
- 5 Attendants
- 2 Maids
- 2 Porters
- 1 Recorder
- 1 Social Service Worker
- 1 Social Service Stenographer

Sincere thanks is expressed to the Needleworkers Guild of America for their regular donation of clothing, and also to the Needlewomen's Friend Society who, as in former years, have taken care of the cutting and sewing of the complete linen requirements.

The Ladies' Aid Committee have been most generous in providing new equipment, linen supplies, and also furnishing teas for the student nurses, which have been a source of keen enjoyment. A Fund used for providing transfusions, special nurses and other emergencies which may arise in connection with the care of the patients was also made possible through the generosity of the Ladies.

At this time an urgent requirement of the Hospital is a rest room for mothers who have to remain many hours for various reasons. Plans including the above room with other space not definitely allotted have been drawn up by the architects, and it is hoped that consideration will be given to this very definite need. A re-arrangement of the room used for sterilizing and washing of bottles will also be worked out if changes in the building are considered at some future time.

Grateful recognition is expressed to the Officers and Directors of the Hospital for their constant support, and to the Staff, Nurses, and Employees for their loyalty and co-operation.

*LADIES' AID COMMITTEE OF THE INFANTS' HOSPITAL  
ANNUAL REPORT 1929*

The activities of the Ladies' Aid Committee of the Infants' Hospital for the year 1929 have continued along the usual lines and have consequently been very interesting.

In April a concert by the Royal Belgian Band was given in the Boston Garden for the benefit of this committee and of the Boston Lying-In Hospital. The proceeds were \$6,979.46 or a little over \$3,000 for each Committee.

Co-operating with Dr. Blackfan, part of this money was used to equip a room for the special study of infants with summer digestive disturbances and it is felt that great progress will be made in these cases by being able to keep the patients in this room where temperature and humidity may be regulated.

An apparatus for artificial respiration was also installed, to be used on patients suffering from Infantile Paralysis whose respiratory muscles are affected. Much relief is obtained from the apparatus and it is hoped to be able to perfect it so that patients who are afflicted in this way may be kept breathing until the normal functioning of the muscles is restored.

The Committee has also furnished Miss Smith with a small Emergency Fund which is used for transfusions, special nursing and other emergencies which may arise. Much painting and general renovating has been done in the hospital, but there is still more to be done in the future.

Several teas were given by the ladies of the Committee and the ladies of the Welfare Committee of the Children's Hospital for the nurses, and these were most successful and largely attended.

Our superintendent, Miss McKenzie, was married during the summer. She has given the hospital a very devoted service and we were sorry to have her leave. Miss Fletcher has been appointed to fill her place, and is doing very well.

Mrs. S. D. Warren resigned as Chairman of the Committee in May, and Mrs. Eliot, as First Vice-President, has taken her place until the Annual Meeting in January, 1930.

Several doctors of the staff have addressed our meetings and in this way our interest is always stimulated.

We are grateful to Miss Smith for her unfailing co-operation with our Committee. It is always an inspiration to work with her for the sick babies and it is hoped that in 1930 the Ladies' Aid Committee will be able to increase its usefulness to the little sufferers at the Infants' Hospital.

Respectfully submitted,

KATHERINE LADD,

*Secretary.*

## REPORT OF THE SOCIAL SERVICE COMMITTEE

COMMITTEE FOR 1929

MRS. JOHN HOMANS, JR., *Chairman*

MRS. WALLACE GOODRICH

MRS. STEPHEN SLEEPER

At the end of the year 1929, the Infants' Hospital Social Service Worker reports a busy year. She has opened 152 cases and has made 1185 visits. She continues the policy of making survey visits to the homes of babies after their admission to the hospital—visiting immediately when the history of the illness indicates some possible maladjustment in the home which could tend to cause the illness—or when the doctors feel that there must be some causes for the illness that only an investigating visit can bring out. Over 200 visits were made to other agencies in Greater Boston for the purpose of gaining helpful information about the families, or to ask for assistance in placing babies when home conditions forbade a baby's returning to its home for a while, as, for instance, when an infectious disease had developed in the home during the baby's stay in the hospital.

During a part of November and December, a survey was made of the seventy-seven premature babies who were in the Infants' Hospital from January, 1927, to the end of June, 1929, and who were sent home in good condition. Visits were made to these, and when it was found that some families had moved and could not be traced by the worker, letters asking the desired information were sent to old addresses to be forwarded. Many of these letters were fully and appreciatively answered.

Another study of a group of fifteen babies was made by two doctors interested in anaemia. The worker made several visits to some of these babies in the endeavor to get them to come to the Out Patient Department for examination.

Nine babies with chronic diseases were transferred to other hospitals—State Infirmary, Long Island; Cambridge T.B. Hospital, etc. Thirty-one babies needing permanent homes or convalescent care were placed—either in private foster homes or under the care of some one of the child-placing agencies.

The worker reports that one of the greatest problems in her work is the lack of a Sanatorium in Boston for babies and children under twelve years who have pulmonary or glandular tuberculosis, for whom there is at present no provision whatever.

Respectfully submitted,

ALICE HOMANS (M.B.S.)

*Chairman Social Service Committee.*
